Proceedings of VIAC in October 2023 Group of Authors, 2023-10-26 International Academic Conferences Management Economics and Marketing Teaching Learning and E learning Transport Logistics Tourism and Sport Science Engineering Robotics IT and Nanotechnology Language, Culture, and the Embodied Mind Joseph Shaules, 2019-12-04 There is an odd contradiction at the heart of language and culture learning Language and culture are so to speak two sides of a single coin language reflects the thinking values and worldview of its speakers Despite this there is a persistent split between language and culture in the classroom Foreign language pedagogy is often conceptualized in terms of gaining knowledge and practicing skills while cultural learning goals are often conceptualized in abstract terms such as awareness or criticality This

book helps resolve this dilemma Informed by brain and mind sciences its core message is that language and culture learning can both be seen as a single interrelated process the embodiment of dynamic systems of meaning into the intuitive mind This deep learning process is detailed in the form of the Developmental Model of Linguaculture Learning DMLL Grounded in dynamic skill theory the DMLL describes four developmental levels of language and culture learning which represents a subtle yet important shift in language and culture pedagogy Rather than asking how to add culture into language education we should be seeking ways to make language and culture learning deeper more integrated embodied experiential and transformational This book provides a theoretical approach including practical examples for doing so

Fostering Culture Through Film Elda Buonanno Foley, Patrizia Comello Perry, 2016-05-11 The perceived lack of understanding of cultural diversity in the American learning community has led instructors to challenge assumptions and stereotypes while addressing misconceptions Teachers of foreign languages and cultural studies in particular feel the need to redesign curricula and lesson plans to better serve the learning community of the twenty first century The common starting point resides in the paradox that exists in today s connected world while global access to information makes learners aware of the infinite variety of cultural diversity it does not however make them critical thinkers For this reason there is opportunity to reshape critical thinking within a more global perspective while enhancing the tools to identify interpret and compare the different cultural models that learners encounter The book demonstrates the theories and practical applications by which instructors use contemporary film to provide insightful readings on diverse local communities communities that form the basis of global culture This collection of essays will serve as a pedagogical tool and resource offering methods and examples of a communicative approach to analyze and integrate cultural diversities similarities and problems in the second language curricula methods that expose students to different cultural models while scaffolding their critical approach to multiple layers of common and specific values This work will encourage a dialogue and long lasting conversation on methodologies and teaching strategies rethought reapplied and remolded to the new learning environments
