Teaching In The Knowledg

Hugh Sockett

Teaching In The Knowledge:

Teaching in the Knowledge Society Andy Hargreaves, 2003-01-01 We are living in a defining moment when the world in which teachers do their work is changing profoundly In his latest book Hargreaves proposes that we have a one time chance to reshape the future of teaching and schooling and that we should seize this historic opportunity Hargreaves sets out what it means to teach in the new knowledge society to prepare young people for a world of creativity and flexibility and to protect them against the threats of mounting insecurity He provides inspiring examples of schools that operate as creative and caring learning communities and shows how years of soulless standardization have seriously undermined similar attempts made by many non affluent schools Hargreaves takes us beyond the dead ends of standardization and divisiveness to a future in which all teaching can be a high skill creative life shaping mission because the knowledge society requires nothing less This major commentary on the state of today s teaching profession in a knowledge driven world is theoretically original and strategically powerful a practical inspiring and challenging guide to rethinking the work of teaching

Educational Research and Innovation Teaching as a Knowledge Profession Studying Pedagogical Knowledge across Education Systems OECD, 2021-10-14 What knowledge do teachers need for 21st century teaching Today teachers have an important role in guiding and shaping students use of digital tools and optimising the educational benefits of their digital experiences

Knowledge and Virtue in Teaching and Learning Hugh Sockett, 2012-03-29 The challenge this book addresses is to demonstrate how in teaching content knowledge the development of intellectual and moral dispositions as virtues is not merely a good idea or peripheral to that content but deeply embedded in the logic of searching for knowledge and truth It offers a powerful example of how philosophy of education can be brought to bear on real problems of educational research and practice pointing the reader to re envision what it means to educate children and how we might prepare teachers to take on such a role by developing the person instead of simply knowledge and skills Connected intimately to the practice of teaching and teacher education the book sets forth an alternative theory of education where the developing person is at the center of education set in a moral space and a political order To this end a framework of public and personal knowledge forms the content to which personal dispositions are integral not peripheral The book s pedagogy is invitational welcoming its readers as companions in inquiry and thought about the moral aspects of what we teach as knowledge

Teaching Teachers for a Knowledge Society R.P. Singh, 2008 The book outlines the type of curriculum teachers must undergo to be able to fit into a new set up for countries like India that are gradually emerging from the stupor of colonialism and vying for a space in the sun There are no shortcuts to power particularly when its defining quality lies in the quality of education It could be defined in terms of its teachers Logically therefore we must focus on teacher preparation

"Growing Up" Teaching Frances Schoonmaker,2002 Focusing on personal knowledge and how it influences teacher development this book follows one teacher Kay from her years of teacher preparation through her time as a seasoned veteran What emerges from this intense 10 year study is a more complete picture of teacher development that will help us to better prepare and support our pre and inservice teachers This book offers a holistic view of learning to teach that challenges traditional boundaries and provides insight into many important issues such as the link between theory and practice teacher retention and how to get teachers to change timeworn pedagogical practices

Mathematical Knowledge in Teaching Tim Rowland,Kenneth Ruthven,2011-01-06 The quality of primary and secondary school mathematics teaching is generally agreed to depend crucially on the subject related knowledge of the teacher However there is increasing recognition that effective teaching calls for distinctive forms of subject related knowledge and thinking Thus established ways of conceptualizing developing and assessing mathematical knowledge for teaching may be less than adequate These are important issues for policy and practice because of longstanding difficulties in recruiting teachers who are confident and conventionally well qualified in mathematics and because of rising concern that teaching of the subject has not adapted sufficiently The issues to be examined in Mathematical Knowledge in Teaching are of considerable significance in addressing global aspirations to raise standards of teaching and learning in mathematics by developing more effective approaches to characterizing assessing and developing mathematical knowledge for teaching
