The Currency of Cultural Patrimony: The Spanish Golden Age Robert Bayliss, 2024-05-15 The Spanish Golden Age a cultural narrative that has developed and over four centuries remains a key element of how Spaniards articulate cultural identities both within Spain and to the outside world The Currency of Cultural Patrimony examines the development of this narrative by artists intellectuals historians academics and institutions By defining the Spanish Golden Age as a diachronic problem it examines several of Spain's most canonical golden age literary narratives including Don Quixote Fuenteovejuna and Las mocedades del Cid as texts whose institutionalization mediation and commercialization over the course of four hundred years inform their meaning both for contemporary Spaniards and for the field of Hispanic Studies around the world Spain's persistent deployment of this cultural patrimony as the canonical epicentre of a national literary tradition has stimulated diverse and often contradictory interpretations the cumulative effect of which informs their reception by each new generation of Spaniards This book's analysis of how this patrimony is interpreted according to both tradition and current circumstances illuminates new angles from which scholars can approach some of Hispanism's most persistent and vexing questions including the growing divide between popular and academic understandings of the Spanish nation's classics
