The 5-year Outlook on Science and Technology ,1981 Promoting Silicon Valleys in Latin America Luciano Ciravegna,2012-08-06 The spectacular economic performance of China East Asia and India during the last ten years has ignited some profound changes in the world economy The share of global demand investments trade and production of the traditional industrialized powers the US Europe and Japan has gradually yet continuously declined This rise of China also has implications for Latin America On the one hand booming Chinese demand for raw materials and food has sustained the economic performance of Latin America during the last decade On the other hand the competitiveness of China and as a hub for advanced manufacturing is threatening Latin America s attempt to diversify its economy from its dependence on the export of natural resource based goods Most Latin American countries are not however waiting passively for their economies to become ever more reliant on high prices for food minerals and oil Leveraging the economic and political stability that they achieved during the last decades many countries in the region such as Brazil Chile Colombia Costa Rica and Uruguay are attempting to capture the growing market for knowledge intensive products and services by breeding their own Silicon Valleys This book discusses the promotion of ICT clusters in Latin America by analyzing the development of the Costa Rican cluster in particular an often celebrated case of successful policy in the region Costa Rica a small country traditionally known for its coffee and wildlife managed to build an information technology cluster within ten years becoming the leading producer of ICT per capita in Latin America Studying the Costa Rican case provides a solid starting point for understanding the challenges of building ICT clusters in Latin America **Participatory Budgeting in Global Perspective** Brian Wampler,Stephanie McNulty,Stephanie L. McNulty,Michael Touchton,2021 Participatory Budgeting continues to spread across the globe as government officials and citizens adopt this innovative democratic program in the hopes of strengthening accountability civil society and well being Governments often adapt PB s basic program design to meet local needs thus creating wide variation in how PB programs function Some programs retain features of radical democracy others focus on community mobilization and yet other programs seek to promote participatory development Participatory Budgeting in Global Perspective provides a theoretical and empirical explanation to account for widespread variation in PB s adoption adaptation and impacts This book develops six PB types to account for the wide variation in how PB programs function as well as the outcomes they produce To illustrate the similar patterns across the globe four empirical chapters present a rich set of case studies that illuminate the wide differences among these programs chapters are organized regionally with chapters on Latin America Asia Sub Saharan Africa Europe and North America By organizing the chapters regionally it becomes clear that there are temporal spatial economic and organizational factors that produce different programs across regions but similar programs within each region A key empirical finding is that the change in PB rules and design is now leading to significant differences in the outcomes these programs produce We find that some programs successfully promote

accountability expand civil society and improve well being but too often researchers do not have any evidence tying PB to significant social or political change **Urban & Regional Technology & Development** ,1979 *International Science and Technology Transfer Act of 1974* United States.
