Fiction Writing Technique Robert Saunders Dowst,2015-05-30 Many books have been written on fiction technique and the chief excuse for the present addition to the number is the complexity of the subject Its range is so wide it calls for so many and so different capacities in one attempting to discuss it that a new work has more than a chance to meet at least two or three deficiencies in all other treatments I believe that the chief deficiency in most works on fiction technique is that the author unconsciously has slipped from the viewpoint of a writer of a story to that of a reader Now a reader without intention to try his own hand at the game is not playing fair in studying technique and a book on technique has no business to entertain him Accordingly I have striven to keep to the viewpoint of one who seeks to learn how to write stories and have made no attempt to analyze the work of masters of fiction for the sake of the analysis alone Get Your Copy Today

The Technique of Fiction Writing Robert Saunders Dowst,2015-09-07 One cannot dabble long at architecture or the graphic arts without gaining keen realization of the fact that conception in its elaborative aspects is as much a part and phase of technique as the executive handling of materials But the art of literature and more narrowly the art of fiction deal with materials other than those employed in the other arts words not colors or marble nor yet sounds are the resource of the story teller to precipitate his conception in enduring form and words are at once frank and mysterious things Introduction I The Writer Himself II The Choice of Matter III Conceptive Technique Story Types IV Conceptive Technique Plot and Situation V Constructive Technique of Narration VI Executive Technique of Narration VII Executive Technique of Narration Continued VIII Description IX Speech X Portrayal of Character XI Atmosphere XII The Short Story XIII The Novel XIV Conclusion Appendix Many books have been written on fiction technique and the chief excuse for the present addition to the number is the complexity of the subject Its range is so wide it calls for so many and so different capacities in one attempting to discuss it that a new work has more than a chance to meet at least two or three deficiencies in all other treatments I believe that the chief deficiency in most works on fiction technique is that the author unconsciously has slipped from the viewpoint of a writer of a story to that of a reader Now a reader without intention to try his own hand at the game is not playing fair in studying technique and a book on technique has no business to entertain him Accordingly I have striven to keep to the viewpoint of

one who seeks to learn how to write stories and have made no attempt to analyze the work of masters of fiction for the sake of the analysis alone Such analysis is interesting to make and also interesting to read but it is not directly profitable to the writer It is indirectly profitable of course but it will give very little direct aid to one who has a definite story idea and wishes to be told the things he must consider in developing it and writing the story or to one who wishes to be told roughly how he should go about the business of finding real stories In fact I believe that discussion and analysis of perfect work has a tendency to chill the enthusiasm of the beginning writer What he chiefly needs is to be told the considerations he must hold in mind in conceiving developing and writing a story The rest lies with his own abilities and capacities to work intelligently and to take pains
