Alworth, 2018-11-20 Site Reading offers a new method of literary and cultural interpretation and a new theory of narrative setting by examining five sites supermarkets dumps roads ruins and asylums that have been crucial to American literature and visual art since the mid twentieth century Against the traditional understanding of setting as a static background for narrative action and character development David Alworth argues that sites figure in novels as social agents Engaging a wide range of social and cultural theorists especially Bruno Latour and Erving Goffman Site Reading examines how the literary figuration of real material environments reorients our sense of social relations To read the sites of fiction Alworth demonstrates is to reveal literature as a profound sociological resource one that simultaneously models and theorizes collective life Each chapter identifies a particular site as a point of contact for writers and artists the supermarket for Don DeLillo and Andy Warhol the dump for William Burroughs and Mierle Laderman Ukeles the road for Jack Kerouac Joan Didion and John Chamberlain the ruin for Thomas Pynchon and Robert Smithson and the asylum for Ralph Ellison Gordon Parks and Jeff Wall and shows how this site mediates complex interactions among humans and nonhumans The result is an interdisciplinary study of American culture that brings together literature visual art and social theory to develop a new sociology of literature that emphasizes the sociology in literature **Less-Supervised Segmentation with CNNs** Jose

Dolz, Ismail Ben Ayed, Christian Desrosiers, 2025-08-29 **Less Supervised Segmentation with CNNs Scenarios Models and Optimization** reviews recent progress in deep learning for image segmentation under scenarios with limited supervision with a focus on medical imaging The book presents main approaches and state of the art models and includes a broad array of applications in medical image segmentation including healthcare oncology cardiology and neuroimaging A key objective is to make this mathematical subject accessible to a broad engineering and computing audience by using a large number of intuitive graphical illustrations The emphasis is on giving conceptual understanding of the methods to foster easier learning This book is highly suitable for researchers and graduate students in computer vision machine learning and medical imaging Presents a good understanding of the different weak supervision models i e loss functions and priors and the conceptual connections between them providing an ability to choose the most appropriate model for a given application scenario Provides knowledge of several possible optimization strategies for each of the examined losses giving the ability to choose the most appropriate optimizer for a given problem or application scenario Outlines the main strengths and weaknesses of state of the art approaches Gives the tools to understand and use publicly available code as well as customize it for specific objectives

Proceedings of the Fifth SIAM International Conference on Data Mining Hillol Kargupta, 2005-04-01

The Fifth SIAM International Conference on Data Mining continues the tradition of providing an open forum for the presentation and discussion of innovative algorithms as well as novel applications of data mining Advances in information technology and data collection methods have led to the availability of large data sets in commercial enterprises and in a wide variety of scientific and engineering disciplines The field of data mining draws upon extensive work in areas such as statistics machine learning pattern recognition databases and high performance computing to discover interesting and previously unknown information in data This conference results in data mining including applications algorithms software and systems
