Four Stars of Valor Phil Nordyke, 2010-11-12 Hailing from the big cities and small towns of America these young men came together to serve their country and the greater good They were the 505th Parachute Infantry Regiment of the 82nd Airborne Division the All Americans Phil Nordyke their official historian draws on interviews with surviving veterans and oral history recordings as well as official archives and unpublished written accounts from more than three hundred veterans of the 505th PIR and their supporting units This is history as it was lived by the men of the 505th from their prewar coming of age in the regiment through the end of World War II when they marched in the Victory Parade up Fifth Avenue in New York to the postwar legacy of having been part of an elite parachute regiment with a record unsurpassed in the annals of combat

A Shield in Space? Sanford Lakoff, Herbert F. York, 2023-04-28 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1989 The Religion of Technology David F. Noble, 2013-01-23 Arguing against the widely held belief that technology and religion are at war with each other David F Noble s groundbreaking book reveals the religious roots and spirit of Western technology It links the technological enthusiasms of the present day with the ancient and enduring Christian expectation of recovering humankind s lost divinity Covering a period of a thousand years Noble traces the evolution of the Western idea of technological development from the ninth century when the useful arts became connected to the concept of redemption up to the twentieth when humans began to exercise God like knowledge and powers Noble describes how technological advance accelerated at the very point when it was invested with spiritual significance By examining the imaginings of monks explorers magi scientists Freemasons and engineers this historical account brings to light an other worldly inspiration behind the apparently worldly endeavors by which we habitually define Western civilization Thus we see that Isaac Newton devoted his lifetime to the interpretation of prophecy Joseph Priestley was the discoverer of oxygen and a founder of Unitarianism Freemasons were early advocates of industrialization and the fathers of the engineering profession Wernher von Braun saw spaceflight as a millenarian new beginning for humankind The narrative moves into our own time through the technological enterprises of the last half of the twentieth century nuclear weapons manned space exploration Artificial Intelligence and genetic engineering Here the book suggests that the convergence of technology and religion has outlived its usefulness that though it once contributed to human well being it has now become a threat to our survival Viewed at the dawn of the new millennium the technological means upon which we have come to rely for the preservation and enlargement of our lives betray an increasing impatience with life and a disdainful disregard for mortal needs David F Noble thus contends that we must collectively strive to disabuse ourselves of the inherited religion of technology and begin rigorously to re examine our

Shane, 2014-10-03 Chich n Itz mouth of the well of the Itza was one of the great centers of civilization in prehistoric America serving between the eighth and twelfth centuries A D as a religious economic social and political capital on the Yucat n Peninsula Within the ancient city there were many natural wells or cenotes One within the ceremonial heart of the city is an impressive natural feature with vertical limestone walls enclosing a deep pool of jade green water some eighty feet below ground level This cenote which gave the city its name became a sacred shrine of Maya pilgrimage described by one post Conquest observer as similar to Jerusalem and Rome Here during the city s ascendancy and for centuries after its decline the peoples of Yucat n consulted their gods and made ritual offerings of precious objects and living victims who were thought to receive prophecies Although the well was described by Bishop Diego de Landa in the late sixteenth century its contents were not known until the early 1900s when revealed by the work of Edward H Thompson Conducting excavations for the Peabody Museum of Harvard University Thompson recovered almost thirty thousand artifacts most ceremonially broken and many beautifully preserved by burial in the deep silt at the bottom of the well The materials were sent to the Peabody Museum where they remained unexhibited for over seventy years In 1984 for the first time nearly three hundred objects of gold jade copper pottery wood copal textile and other materials from the collection were gathered into a traveling interpretive exhibition No other archaeological exhibition had previously given this glimpse into Maya ritual life because no other collection had objects such as those found in the Sacred Cenote Moreover the objects from the Cenote come from throughout Mesoamerica and lower Central America representing many artistic traditions The exhibit and this its accompanying catalog marked the first time all of the different kinds of offerings have ever been displayed together and the first time many have been published Essays by Gordon R Willey and Linnea H Wren place the Cenote of Sacrifice and the great Maya city of Chich n Itz within the larger context of Maya archaeology and history The catalog entries written by Clemency Chase Coggins describe the objects displayed in the traveling exhibition Some entries are brief descriptive statements others develop short scholarly themes bearing on the function and interpretation of specific objects Coggins introductory essay describes how the objects were collected by Thompson and how the exhibition collection has been studied to reveal the periods of Cenote ritual and the changing practices of offering to the Sacred Cenote *The American Shorthorn Herd Book* , 1902 **The Final Frontier** Dale Carter, 2020-05-05 Stunned by the news of Sputnik in 1957 the American public were to be treated over the next dozen years to the spectacle of an all out national crusade the race to beat the Russians to the moon What few understood at the time and what has largely been obscured in popular representations of this episode in movies and bestsellers was the key economic and technical role played by manned space exploration in post war US capitalist expansion From Potsdam to Cape Canaveral the yellow brick road twisted and turned but its ultimate goal

remained clear the Oz of global American economic and political domination Taking off from that masterpiece of American fiction Thomas Pynchon's *Gravity's Rainbow* Dale Carter tells the lurid tale of the postwar boom through the history of the manned space program Salvaged from the ashes of Nazi Germany Pynchon's *Oven State* as US officials rounded up the Third Reich's leading V 2 scientists the American Rocket State embarked on an upward path that would culminate in the epochal voyage of Apollo XI in 1969 Following this path Carter gives an innovative brilliant account of American culture and society during the Cold War He charts the ideological and political significance of a range of phenomena from films like *High Society* *Destination Moon* and *When Worlds Collide* to John F Kennedy's rise to power from the emergence of a new high tech economy fueled by the NASA led transformation of the aerospace industry to the last flight of the space shuttle Challenger His highly original account of the star spangled space age sets a new standard for the study of American culture

Hinduism and the Ethics of Warfare in South Asia Kaushik Roy, 2012-10-15 This book challenges the view common among Western scholars that precolonial India lacked a tradition of military philosophy It traces the evolution of theories of warfare in India from the dawn of civilization focusing on the debate between Dharmayuddha Just War and Kutayuddha Unjust War within Hindu philosophy This debate centers around four questions What is war What justifies it How should it be waged And what are its potential repercussions This body of literature provides evidence of the historical evolution of strategic thought in the Indian subcontinent that has heretofore been neglected by modern historians Further it provides a counterpoint to scholarship in political science that engages solely with Western theories in its analysis of independent India's philosophy of warfare Ultimately a better understanding of the legacy of ancient India's strategic theorizing will enable more accurate analysis of modern India's military and nuclear policies *Coates's Herd Book* Henry Strafford, 1896 **The Clydesdale Stud-book. ...** Clydesdale Horse Society of Great Britain and Ireland, 1887
