serve as required reading in both military and business schools Kirkus Reviews Throughout his life Edgar F Beau Puryear has studied America's top military leaders In his research for this book he has sought to discover what allowed them to rise above their contemporaries what prepared them for the terrible responsibilities they bore as the commanders of our armed forces during World War II Korea Vietnam the Gulf and on to today how they are different from you and me Ultimately first and foremost Dr Puryear discovered that character is the single most important and the most distinctive element shared by these individuals that character is everything Beau Puryear again reaches into his gold mine of research and comes forward with the essence of great generalship Well done and a worthy read General Colin L Powell We can always learn more about the importance of character to successful leadership With this book we do just that General H Norman Schwarzkopf

Marshall's Great Captain Kathy Wilson, 2024-04-23 On May 3 1943 dozens of airplanes could be seen flying in and out of Royal Air Force Bovingdon Airfield near London England Among the aircraft seen that day was a B 24D bomber named Hot Stuff which carried the Commanding General of US Forces in Europe Lieutenant General Frank M Andrews the officer charged with formulating a plan to invade the European continent Speculation was that General George C Marshall had called Andrews back to Washington DC leading many to believe that Marshall had another promotion in store for Andrews Tragically Andrews would never arrive While attempting to land in Iceland the bomber crashed into the side of a mountain with no survivors other than the tail gunner Andrews's personal papers were also destroyed In Marshall's Great Captain Lieutenant General Frank M Andrews author Kathy Wilson details Andrews's extraordinary life and career The first biography dedicated to the namesake of Joint Base Andrews this book sheds a light on Andrews's crucial role in orchestrating US involvement in World War II as well as the professional relationship and rapport that Andrews and Marshall shared Drawing on extensive research Wilson raises Andrews's legacy to its legitimate place within the annals of both air power and World War II history and posits that there is a high probability that Andrews rather than Dwight D Eisenhower was Marshall's first choice for the office of Supreme Allied Commander Marshall recounted that Andrews was the only one he had a chance to prepare for such a command **Air Force Magazine** ,2016-07 *World War II, the European and Mediterranean Theaters* Myron J. Smith, 1984 **Annual Catalogue** United States Air Force Academy, 1981 *Made, Not Born* Bruce Newsome, 2007-09-30 Why do the combat capabilities of individual soldiers vary so much This book seeks to provide an answer to this and other questions about variability in combat performance Some soldiers flee quickly from the battlefield while others endure all hardships until the bitter end Some combat units can perform numerous types of missions while others cannot keep themselves organized during peacetime Some militaries armed with obsolete weapons have out fought enemies with the latest weapons just as some massively outnumbered armies have beaten back much larger opponents In this first social scientific study of the effectiveness of combat troops Newsome evaluates competing explanations for the varying combat capabilities and performances There are four main explanations each emphasizing the influence of a single

factor The first focuses on material endowments How well funded are the troops Do they have the latest protective gear and the most advanced weaponry Second some analysts claim that democracies produce better commanders superior strategies more motivated personnel or better managed personnel others however associated those characteristics with more authoritarian forms of government Third is the idea that giving more power to the troops on the ground in individual combat units empowers them with decision making capability and adaptability to fast changing situations and circumstances Newsome presents evidence that decentralized personnel management does correlate with superior combat performance Fourth soldier capabilities and performance often are assumed to reflect intrinsic attributes such as prior civilian values Newsome argues that the capabilities of combat soldiers are acquired through military training and other forms of conditioning but he does not entirely discount the role of a soldier s individual character In the age old nature vs nurture argument he finds that intrinsic qualities do count but that extrinsic factors such as training and environment matter even more
