Jon Wertheim, 2012-01-17 In *Scorecasting* University of Chicago behavioral economist Tobias Moskowitz teams up with veteran Sports Illustrated writer L. Jon Wertheim to overturn some of the most cherished truisms of sports and reveal the hidden forces that shape how basketball baseball football and hockey games are played won and lost Drawing from Moskowitz's original research as well as studies from fellow economists such as bestselling author Richard Thaler the authors look at the influence home field advantage has on the outcomes of games in all sports and why it exists the surprising truth about the universally accepted axiom that defense wins championships the subtle biases that umpires exhibit in calling balls and strikes in key situations the unintended consequences of referees' tendencies in every sport to swallow the whistle and more Among the insights that *Scorecasting* reveals Why Tiger Woods is prone to the same mistake in high pressure putting situations that you and I are Why professional teams routinely overvalue draft picks The myth of momentum or the hot hand in sports and why so many fans coaches and broadcasters fervently subscribe to it Why NFL coaches rarely go for a first down on fourth down situations even when their reluctance to do so reduces their chances of winning In an engaging narrative that takes us from the putting greens of Augusta to the grid iron of a small parochial high school in Arkansas *Scorecasting* will forever change how you view the game whatever your favorite sport might be **Starting Out Right** Si Millican, 2012-08-09 *Starting Out Right* Beginning Band Pedagogy is the only complete resource for organizing planning and teaching beginning woodwind brass and percussion students The book covers every aspect of teaching beginning band students from the first sounds on the instruments through the first full band performances It is the only comprehensive reference that offers step by step guidelines for teaching each beginning band instrument as well as organizing and running a successful beginning band program Based on the public school teaching experience of the author the book is designed for use in undergraduate methods and pedagogy classes as well as for clinics and workshops at the undergraduate and graduate levels This book is also designed to be a reference for the many novice teachers who lead beginning bands or those teachers whose expertise is not in the band realm While the focus of the book is on teaching beginning band much of the book can be of use to band instructors at any grade level The book is divided into several parts which cover the sound to sign to theory approach to teaching musical literacy child development as it relates to teaching music recruiting and retaining students developing fundamental sounds and skills on each woodwind brass and percussion instrument teaching students to read tonal and rhythmic music notation and selecting and rehearsing beginning band solo ensemble and full band music The book also addresses curriculum design scheduling and staffing of band programs Ideas about managing student records inventory and
