Play Practice Alan Launder, Wendy Piltz, 2013-03-01

Play Practice Engaging and Developing Skilled Players Second Edition provides an alternative to traditional sport instruction. This innovative and authentic approach to teaching sports combines contemporary theory with the experience of practical and reflective work in real sport environments. Coauthors Alan Launder and Wendy Piltz both with wide ranging experience as players, teachers and coaches expand and update the play practice approach they presented in the first edition and show how it can be used to help improve sport skills for players of all ages and abilities. This flexible model of sport pedagogy can be applied as a whole or one element at a time. It covers a wide range of team and individual sports including archery, table tennis, flag football, snow skiing, cricket and track and field. Plus you'll find a wealth of field tested ideas for working with diverse learners in schools and communities. The second edition highlights the significance of key terms such as games sense, technique, resilience and fair play. It also provides new information relating to the complexity of learning and addresses the difficulties beginners face in the learning process. The second edition of *Play Practice* integrates a thorough analysis of skilled performance with an understanding of the conditions under which people best learn. It also shows how the strategies of simplifying, shaping, focusing and enhancing can help you create situations to maximize learning and positively influence the attitudes of learners. Over 130 illustrations and photos demonstrate specific approaches, ideas that can work for multiple sports and ways to apply the approach with beginners through elite players. Summary sections in each chapter help you quickly identify and review key topics. And two bonus chapters about the origins, evolution and theoretical bases for *Play Practice* are available free for download at www.HumanKinetics.com. *Play Practice* is based on the idea that an individual's commitment to achieving mastery is a powerful motivator for learning. Learn to harness these motivators and create enjoyable practice situations in which learners young and old, whether resistant beginners or highly motivated professionals are encouraged to strive for excellence.

The Coach's Guide to Teaching Doug Lemov, 2020-12-07 The mark of a great coach is a constant desire to learn and grow A hunger to use whatever can make them better The best selling author of Teach Like a Champion and Reading Reconsidered brings his considerable knowledge about the science of classroom teaching to the sports coaching world to create championship caliber coaches on the court and field What great classroom teachers do is relevant to coaches in profound ways After all coaches are at their core teachers Lemov knows that coaches face many of the same challenges found in the classroom so the science of learning applies equally to them Unfortunately coaches and organizations have a mixed level of understanding of the research and study of the science of learning Sometimes coaches and organizations build their teaching on myths and platitudes more than science Sometimes there isn't any science applied at all While there are thousands of books and websites a coach can consult to better understand technical and tactical aspects of the game there is nothing for a coach to consult that explicitly examines the teaching problems on the field the court the rink and the diamond Until now Intended to offer lessons and guidance that are applicable to coaches of any sporting endeavor including everyone from parent volunteers to professional coaches and private trainers Lemov brings the powerful science of learning to the arena of sports coaching to create the next generation of championship caliber coaches
