Teaching Science Through Technology Part :

Teaching Science and Investigating Environmental Issues with Geospatial Technology James MaKinster, Nancy Trautmann, Michael Barnett, 2013-11-05 The emerging field of using geospatial technology to teach science and environmental education presents an excellent opportunity to discover the ways in which educators use research grounded pedagogical commitments in combination with their practical experiences to design and implement effective teacher professional development projects Often missing from the literature are in depth explicit discussions of why and how educators choose to provide certain experiences and resources for the teachers with whom they work and the resulting outcomes The first half of this book will enable science and environmental educators to share the nature and structure of large scale professional development projects while discussing the theoretical commitments that undergird their work Many chapters will include temporal aspects that present the ways in which projects change over time in response to evaluative research and practical experience In the second half of the book faculty and others whose focus is on national and international scales will share the ways in which they are working to meet the growing needs of teachers across the globe to incorporate geospatial technology into their science teaching These efforts reflect the ongoing conversations in science education geography and the geospatial industry in ways that embody the opportunities and challenges inherent to this field This edited book will serve to define the field of teacher professional development for teaching science using geospatial technology As such it will identify short term and long term objectives for science environmental and geography educators involved in these efforts As a result this book will provide a framework for future projects and research in this exciting and growing field

Science, Technology, and Society David D. Kumar, Daryl E. Chubin, 2000-04-30 This volume will take a comprehensive view of STS education the goals of which are manifold and include making science and technology literacy available for all Americans preparing those not bound for college to compete successfully in an increasingly science and technology oriented global market and equipping the average person with the information necessary for making informed personal and policy decisions concerning the role of science and technology in society

Professional Development for Primary Teachers in Science and Technology Marc J. de Vries, Hanno van Keulen, Sylvia Peters, Juliette Walma van der Molen, 2012-01-01 This book presents the research output of the Dutch project VTB Pro an internationally oriented project that aimed at providing primary school teachers with the knowledge abilities and attitudes that are necessary to implement science and technology education in their classes An introductory chapter by Wynne Harlen and Pierre Lena positions this project in the international context From the Foreword by Dr Michel Rocard I have been pleased to discover the VTB Pro three years project carried in the Netherlands Broadening technological education in primary school Focusing on professional development of teachers and presenting first hand testimonies and research the present book demonstrates how to deal with this issue so critical for a renewed pedagogy With proper methods the knowledge of science the interest in

science and technology the pedagogical skills can all be improved among teachers who often have no or little affection for science *Science Literacy in Primary Schools and Pre-Schools* Haim Eshach,2006-08-12 Science is more than a compilation of facts and figures although one would not know that from observing classroom lessons in science in elementary schools in many parts of the world In fact there are those who argue that science is not appropriate subject content for the early grades of elementary school There are many schools in which science is simply not present in the earliest grades Even where science is taught in the earliest grades it is often a caricature of science that is presented to the children This book offers a vigorous reasoned argument against the perspective that science doesn't belong in the early grades It goes beyond that in offering a view of science that is both appropriate to the early grades and faithful to the nature of the scientific enterprise Dr Eshach is not a voice in the chorus that claims young children's developmental lack of readiness for such study He believes as do I that in order to learn science one must do science At the heart of the doing of science is the act of exploration and theory formation To do science we must explore the ways in which the world around us looks sounds smells feels and behaves **Teaching Science Online** Dietmar Kennepohl,2023-07-03 With the increasing focus on science

education growing attention is being paid to how science is taught Educators in science and science related disciplines are recognizing that distance delivery opens up new opportunities for delivering information providing interactivity collaborative opportunities and feedback as well as for increasing access for students This book presents the guidance of expert science educators from the US and from around the globe They describe key concepts delivery modes and emerging technologies and offer models of practice The book places particular emphasis on experimentation lab and field work as they are fundamentally part of the education in most scientific disciplines Chapters include Discipline methodology and teaching strategies in the specific areas of physics biology chemistry and earth sciences An overview of the important and appropriate learning technologies ICTs for each major science Best practices for establishing and maintaining a successful course online Insights and tips for handling practical components like laboratories and field work Coverage of breaking topics including MOOCs learning analytics open educational resources and m learning Strategies for engaging your students online

Teaching Science and Technology in the Early Years (3-7) Dan Davies,Alan Howe,Christopher Collier,Rebecca Digby,Sarah Earle,Kendra McMahon,2014-04-24 Teaching Science and Technology in the Early Years 3-7 celebrates young children's amazing capabilities as scientists designers and technologists Research based yet practical and accessible it demonstrates how scientific designing and making activities are natural to young children and have the potential for contributing to all aspects of their learning By identifying the scientific and design related concepts skills and activities being developed the book enables the reader to make more focused diagnostic observations of young children and plan for how they can help move them forward in their learning This second edition has been thoroughly updated and features Six new chapters providing practical advice and examples for enhancing scientific and technological learning through thematic

approaches a new chapter focusing on the outdoor learning environment and how this can support science and technology new case studies of successful early years practice alongside examples of practical planning for learning and advice on documenting children's learning stories guidance on the role of talk narrative documentation and planning in relation to early years science and technology Based on the latest research and the first hand experience this practical and accessible book is essential reading for early years and primary students on undergraduate and Masters level courses "A Revised and Intensified Science and Technology Curriculum Grades K-12 Urgently Needed for Our Future", 1983

Promoting Positive Learning Experiences in Middle School Education Gaines, Cherie Barnett, Hutson, Kristy M., 2021-01-15 Declining academic performance along with a growing apathy of students toward the value of education demonstrates that students in the United States public education system do not recognize the value of a positive experience in middle schools A plethora of research and writing has been done on elementary schools and secondary schools but middle school education as a whole has been left behind For this reason there is the need for current research on all aspects and topics that may contribute to middle school student success Promoting Positive Learning Experiences in Middle School Education focuses on the ideal conditions for maximizing student success and engagement in middle school education The chapters take a deeper

look into the modern tools technologies methods and theories driving current research on middle school students their teachers their classroom environment and their learning Highlighting topics such as curriculum reform instructional strategies and practices effective teaching and technology in the modern classroom this book is ideally intended for middle school teachers middle school administrators and school district administrators along with practitioners stakeholders researchers academicians and students interested in middle school education and student success Teaching and Learning Design and Technology John Eggleston, 2004-12-30 Here is an increasingly wide agreement among teachers researchers inspectors advisers and policy makers that both teaching and research will benefit from being brought closer together But how can this be achieved Hard pressed practitioners cannot be expected to review a constant flow of conference papers journals and other publications even if such items were accessible and clearly understood This unique book synthesizes relevant research findings for the professional practitioner and highlights their implications for the quality of teaching and learning Whether you are a teacher looking to improve your practice through applying the latest thinking in your subject or a researcher looking for a concise review of the literature this book will prove to be a valuable acquisition
