Teaching For Achievement In Urban Middle:

Teaching for Achievement in Urban Middle Schools Beverly Bimes-Michalak, 1998 **Teaching Science with Hispanic ELLs in K-16 Classrooms** Dennis W. Sunal, Cynthia S. Sunal, Emmett L. Wright, 2010-04-01

The goal of this fourth volume of RISE was to provide a research foundation that demonstrates an agenda to strengthen the preparation and enhancement of teachers of science for regions and states experiencing extensive initial growth of Hispanic ELLs in schools. The goal was carried out through a series of events that led to the planning and subsequent dissemination of research being conducted by various stakeholders throughout the United States. Researchers were first invited from regions of the country that have had a long history of with Hispanic ELLs in classrooms as well as those regions where initial and now extensive growth has occurred only in the past few years. A national conference, Science Teacher Education for Hispanic English Language Learners in the Southeast (SHELLS), funded through the National Science Foundation, was used as one of the dissemination methods to establish and secure commitments from researchers to conduct and report research to strengthen teacher preparation for science. The national call for manuscripts requested the inclusion of major priorities and critical research areas, methodological concerns, and concerns and results of implementation of teacher preparation and development programs.

Partnering to Prepare Urban Teachers American Association of Colleges for Teacher Education, 2008

This book attempts to present both theoretical and practical perspectives on school and university partnerships that focus on the preparation and retention of urban teachers. In particular, the book focuses on a theoretical and historical underpinning of partnering to prepare urban teachers as social activists; b) stories from the field explored through the voices and actions of students, families, teacher educators, and preservice and in-service teachers; and c) a critical analysis of this work. The research presented is situated in urban settings that mirror those across the United States and represents partnerships in Boston, Chicago, Cleveland, Los Angeles, and Wilmington where school, city, and teacher education communities collaborate to prepare and keep teachers in hard-to-staff high-needs schools. Case studies included in the text explore multiple perspectives on partnering to prepare urban teachers, including those of urban schoolchildren and their teachers, teacher educators, and teachers becoming teacher educators and parents. Combined, the chapters theoretically and practically detail the layers and conundrums, tribulations and triumphs, contexts and voices of the challenges facing urban teachers, teacher educators, community members, and administrators who work collaboratively to prepare and support teachers as social activists.

Success in the Urban Classroom, 2002 [The Role of Public Policy in K-12 Science Education](#) George E. DeBoer, 2011-01-01

The goal of this volume of Research in Science Education is to examine the relationship between science education policy and practice and the special role that science education researchers play in influencing policy. It has been suggested that the science education research community is isolated from the political process, pays little attention to policy matters, and has little influence on policy. But to influence policy, it is important to understand

how policy is made and how it is implemented This volume sheds light on the intersection between policy and practice through both theoretical discussions and practical examples This book was written primarily about science education policy development in the context of the highly decentralized educational system of the United States But because policy development is fundamentally a social activity involving knowledge values and personal and community interests there are similarities in how education policy gets enacted and implemented around the world This volume is meant to be useful to science education researchers and to practitioners such as teachers and administrators because it provides information about which aspects of the science education enterprise are affected by state local and national policies It also provides helpful information for researchers and practitioners who wonder how they might influence policy In particular it points out how the values of people who are affected by policy initiatives are critical to the implementation of those policies **Second International Handbook of Science Education** Barry J. Fraser, Kenneth Tobin, Campbell J. McRobbie, 2011-12-13 The International Handbook of Science Education is a two volume edition pertaining to the most significant issues in science education It is a follow up to the first Handbook published in 1998 which is seen as the most authoritative resource ever produced in science education The chapters in this edition are reviews of research in science education and retain the strong international flavor of the project It covers the diverse theories and methods that have been a foundation for science education and continue to characterize this field Each section contains a lead chapter that provides an overview and synthesis of the field and related chapters that provide a narrower focus on research and current thinking on the key issues in that field Leading researchers from around the world have participated as authors and consultants to produce a resource that is comprehensive detailed and up to date The chapters provide the most recent and advanced thinking in science education making the Handbook again the most authoritative resource in science education **EBOOK: Improving Urban Schools: Leadership and Collaboration** Mel Ainscow, Mel West, 2006-03-16 The improvement of urban schools is one of the major challenges facing practitioners and policy makers today Issues related to poverty create particular difficulties in urban schools and the emphasis on market led improvement strategies has tended to add to these challenges In addition strategies for raising standards as measured by aggregate test and examination results can result in marginalisation or exclusion of some groups of learners Drawing on research evidence Improving Urban Schools addresses the question of how primary and secondary urban schools can be improved in a more inclusive way The authors argue that urban schools and their communities have within them expertise that tends to be overlooked and latent creativity that should be mobilised to move thinking and progress forward They show that new approaches to leadership various forms of collaborative school to school partnerships and major changes in national policy development are needed to make use of this untapped energy The book includes vivid accounts of these activities to shed light on what really happens in urban schools and presents practical strategies for school leaders and practitioners who want to make a difference in urban schools **Urban Development and**

Planning Bikram Pattanaik,2025-03-20 This book details the most contemporary concerns related to urban development governance and planning as well as the challenges to urban administration It analyses the policies and programmes adopted by both high income and lower middle income countries to achieve sustainable urbanization and their application and treatment to help students get a holistic practical perspective of the issues at hand This volume elucidates urban development theories and approaches coupled with urban planning local government finance urban management and urban governance It also discusses urban issues and challenges such as education health waste management land use planning housing and transport Critical concerns related to urban water bodies open spaces urban heritage and smart cities and urban future are similarly addressed This book will be useful to students researchers and teachers of urban planning and architecture urban sociology economics geography environmental science and public administration It shall also be useful to NGOs parastatal bodies and trainers of urban planning and development Planners policymakers functionaries and elected representatives of urban local bodies may also use this book as a capacity building instrument
