A truly thought provoking interactive book with a difference that takes teachers on a learning journey. It encourages us to reflect on how we learn how our pupils learn and what the collective implications for effective teaching and helping pupils to construct their learning are. Reading and actively engaging with this book is indeed a learning journey invaluable to practitioners. The text contains many invaluable references and deals with topics such as the value of homework, how people learn and how people respond to techniques addressed to them in learning situations. An essential reading for practicing teachers and particularly students in training and their tutors. Dr Sue Dale Tunnicliffe, Senior lecturer in Science Education, Institute of Education, University of London, UK. There has never been a time when independent learning is more important in school science. In *Developing Independent Learning in Science*, Liz Lakin challenges the reader to examine how they teach science and why pupils respond as they do. The result is a book that should be of great value to those who teach science to 7-12 year olds and to science educators in general. A particular strength is the way the author interweaves rigorous thinking about learning with activities for the reader to help them engage with the text. In addition, there is a mass of useful thinking in here and plenty of classroom suggestions. The book is worth reading simply for the honesty of the How not to climb Helvellyn case study. Michael J Reiss, Professor of Science Education, Institute of Education, University of London, UK. In this book, Liz Lakin involves the readers in the kind of independent learning that she is describing and advocating. It should enable practising teachers to stand back from their work to consider why we want children to learn in a certain way as well as providing useful ideas about how to do it. It is written in a personal and engaging style and is a unique addition to books on science teaching. Wynne Harlen, OBE, PhD, Visiting Professor of Education, University of Bristol, UK.
