Teaching and Researching: Reading William Peter

Grabe, Fredricka L. Stoller, 2013-11-26 *Teaching and Researching Reading* was first written to help language professionals understand the complex nature of reading. Now in a thoroughly updated and improved second edition, the book expands connections from research on reading to instructional practices and teacher-initiated action research. Offering an updated overview of reading theory, it summarises key ideas and issues in first and second language contexts. In addition to providing insightful research analyses, Grabe and Stoller offer practical advice for practitioners and researchers, including evidence-based teaching ideas and a multi-step iterative process for conducting meaningful action research on reading-related topics. The volume outlines 29 projects for teacher adaptation and use, as well as numerous new or substantially expanded resource materials that can be used for both action research and classroom instruction. Learning aids featured throughout the volume include key concept boxes and a glossary of key terms, quote boxes highlighting critical issues in the field, resource lists of relevant journals, books, and websites. Fully revised throughout with a range of new exemplary L1 and L2 research studies and an entirely new chapter on the move from research implications to instructional applications, this second edition of *Teaching and Researching Reading* is an invaluable resource for teacher trainers, practicing teachers, materials writers, and researchers alike.

Engaging Students in Disciplinary Literacy, K-6 Cynthia H. Brock, Virginia J. Goatley, Taffy E. Raphael, Elisabeth Trost-Shahata, Catherine M. Weber, 2014 This accessible book will help elementary school teachers improve literacy instruction inside or outside the Common Core environment. The authors address teachers' instructional needs by introducing key concepts from current trends in literacy education, from high-level standards to the use of 21st-century literacies. Readers then follow teachers as they successfully implement the curriculum they developed to promote high-level thinking and engagement with disciplinary content. The text focuses on three disciplinary literacy units of instruction: a science unit in a 2nd-grade classroom, a social studies/history unit in a 4th-grade classroom, and a mathematics unit in a 6th-grade classroom. Each unit revolves around a central inquiry question and includes research-based strategies for using reading, writing, and classroom talk as tools to foster disciplinary understandings. This unique insider's look at how real teachers build and implement a Common Core-aligned curriculum will be an invaluable resource for teachers, schools, and districts as they move forward to align their own curricula. I can't imagine a more timely book: a set of elegant principles and some stunning examples of how teachers can use reading, writing, and talk to enhance learning in the science, social studies, and mathematics classroom.
