Teaching Writing In All Disciplines

Mary Deane, Peter O'Neill

Teaching Writing In All Disciplines:

A TA's Guide to Teaching Writing in All Disciplines Beth Finch Hedengren, 2015-03-03 Written specifically for teaching assistants responsible for WAC or WID courses A TA's Guide to Teaching Writing in All Disciplines provides the practical advice that teaching assistants no matter the discipline need in order to teach and evaluate writing effectively This informative text is perfectly suited to a teaching assistants training course or it can serve as a reference for teaching assistants to use on their own *Teaching Writing in All Disciplines* C. Williams Griffin, 1982 *Until I See what I Say* Karen Burke LeFevre, Mary Jane Dickerson, 1981 **The Elements of Teaching Writing** Katherine Gottschalk, Keith Hjortshoj, 2003-12-24 Drawing on their extensive experience training instructors in all disciplines to incorporate writing in their courses Gottschalk and Hjortshoj provide time saving strategies and practical guidance in this brief well written reference Accommodating a wide range of teaching styles and class sizes Elements offers reliable advice about how to design effective writing assignments and how to respond to and evaluate student writing in any course **Local Knowledges, Local Practices** Jonathan Monroe, 2003 After ten years of teaching one contributor describes the impact her involvement in the writing program had on her career as a massive paradigm shift teaching centered not on what I knew but what somebody else needed to know *The Writing Revolution* Judith C. Hochman, Natalie Wexler, 2017-07-27 Why you need a writing revolution in your classroom and how to lead it The Writing Revolution TWR provides a clear method of instruction that you can use no matter what subject or grade level you teach The model also known as The Hochman Method has demonstrated over and over that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback Insurmountable as the challenges faced by many students may seem The Writing Revolution can make a dramatic difference And the method does more than improve writing skills It also helps Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing There's no separate writing block and no separate writing curriculum Instead teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well It breaks the writing process down into manageable chunks and then has students practice the chunks they need repeatedly while also learning content

Teaching Writing in the Content Areas Vicki Urquhart, Monette McIver, 2005 This book examines nearly 30 years of research to identify how teachers can incorporate writing instruction that helps students master the course content and improve their overall achievement Building on the recommendations of the National Commission on Writing authors Vicki Urquhart and Monette McIver introduce four critical issues teachers should address when they include writing in their content courses Creating a positive environment for the feedback and guidance students need at various stages including

prewriting drafting revising and editing Monitoring and assessing how much students are learning through their writing Choosing computer programs that best enhance the writing process Strengthening their knowledge of course content and their own writing skills

Student Writing in the Quantitative Disciplines Patrick Bahls, 2012-01-19 Designing interesting problems and writing assignments is one of the chief tasks of all teachers but it can be especially challenging to translate and apply learning theory good teaching techniques and writing assignments into STEM and other quantitative disciplines Student Writing in the Quantitative Disciplines offers instructors in math based disciplines meaningful approaches to making their coursework richer and more relevant for their students as well as satisfying institutional imperatives for writing curricula This important resource provides instructors with the hands on skills needed to guide their students in writing well in quantitative courses at all levels of the college curriculum and to promote students general cognitive and intellectual growth Comprehensive in scope the book includes Ideas for using writing as a means of learning mathematical concepts Illustrative examples of effective writing activities and assignments in a number of different genres Assessment criteria and effective strategies for responding to students writing Examples of ways to help students engage in peer review revision and resubmission of their written work Those of us who spend our lives urging faculty in all disciplines to integrate more writing into their courses have wished for the day when someone like Patrick Bahls would step forward with a book like this one Chris M Anson University Distinguished Professor and director Campus Writing and Speaking Program North Carolina State University Written by a mathematician this readable theoretically sound book describes practical strategies for teachers in the quantitative sciences to assign and respond to students writing It also describes numerous approaches to writing that engage students in disciplinary learning collaborative discovery and effective communication Art Young Campbell Professor of English emeritus Clemson University Loaded with practical advice this timely important and engaging book will be an invaluable resource for instructors wishing to bring the benefits of writing to learn to the quantitative disciplines As a mathematician thoroughly grounded in writing across the curriculum scholarship Bahls brings humor classroom experience and pedagogical savvy to a mission he clearly loves improving the quality of student learning in math and science John C Bean professor Seattle University and author Engaging Ideas

Teaching Writing Cynthia L. Caywood, Gillian R. Overing, 1987-01-01 This anthology explores the relationship between feminism and writing theory The chapters cover the major issues basic pedagogical theory and philosophical approaches to the teaching of writing studies of problems encountered by female writers and writing instructors and useful how to essays on classroom technique The authors also address important provocative questions about power in the classroom its use abuse and distribution The book is based on the concept of equity which the editors define Equity does not mean to us the abolition of differences among individuals nor does it imply a blanket imposition of an Orwellian homogeneity It does not mean stifling some voices so that others may be heard it does not demand the compromising of academic standards in the name of egalitarianism Equity as we

understand it creates new standards which accommodate and nurture differences Equity fosters the individual voice in the classroom investing students with confidence in their own authority Equity unleashes the creative potential of heterogeneity this definition of equity is at the heart of this anthology and our attempts as teachers to model our pedagogy on this principle provided the impetus for assembling it from the Introduction *Writing in the Disciplines* Mary Deane, Peter O'Neill, 2011-08-23 Writing in the Disciplines WiD is a growing field in which discipline based academics writing developers and learning technologists collaborate to help students succeed as subject specialists This book places WiD in its theoretical and cultural contexts and reports on initiatives taking place at a range of UK higher education institutions Also includes surveys of current developments and scholarship in the US Australia Europe and elsewhere making it of interest to both a UK and an international audience

Fuel your quest for knowledge with Learn from is thought-provoking masterpiece, **Teaching Writing In All Disciplines** .
