Teams And Technology Fulfilling The Promise Of The New Organization:

Teams and Technology Harvard Business Review Staff,1996-03-01 Teams Technology is the guidebook on how to design use terms technology together to improve corporate performance Based on their research experience in over 100 companies the authors develop a framework for integrating team technological organizational change present specific recommendations for implementation Teams Technology shows how to develop new information systems that support collaborative work how to build teams that take advantage of technological potential how to create an organization with a structure policies that support the synergy of teams technology Teams and Technology Donald A. Mankin,Susan G.. Cohen,Susan G. Cohen,Tora K. Bikson,Tora K.. Bikson,1996 Introduces the concept of MDI Mutual Design and Implementation and shows how to set up teams and use MDI to implement change

Shaping Organization Form Gerardine DeSanctis,Janet Fulk,1999-07-20 Shaping Organization Form considers the role of new communication technologies in shaping organizations today and in the future Four key themes are considered in depth changes in technology changes in organizational form and their mutual influence on one another evolutionary processes in organizations and the ways in which technology can influence these processes the development of organizational communities and inter organizational relationships that are mediated by electronic communication systems and major controversies surrounding electronically mediated organizations and directions for future research that flow out of these controversies *New Information Technologies in Organizational Processes*

Ojelanki Ngwenyama,Lucas D. Introna,Michael D. Myers,Janice I. DeGross,2013-06-05 A number of relatively new technologies such as Enterprise Resource Planning systems the Internet and intranets have entered the organizational landscape These technologies have not only enabled a wide range of social and organizational transformations but have also challenged much of the received wisdom that operates in academic and industrial discourses This book attempts to capture some of these strands by discussing the social and organizational issues surrounding the implementation and use of these new technologies in organizational processes Some of the contributions are critical and reflexive by nature while others offer rich insights through the analysis of cases The book represents a wide scope of traditions of thought as well as research approaches in addressing these emerging issues A number of practical and theoretical topics are discussed in detail including Implementation of ERP Electronic commerce Intranet implementation The management of standards Issues of organizational analysis Understanding BPR tools Collaborative technologies Knowledge work environments This book contains the selected proceedings of the International Working Conference on New Information Technologies in Organizational Processes Field Studies and Theoretical Reflections on the Future of Work organized by the International Federation for Information Processing IFIP and held in St Louis Missouri USA in August 1999 This valuable new title will be essential reading for researchers working in information systems and management technology social and organization studies **New Directions in Management and Organization Theory** Jeffrey A. Miles,2014-03-25 This book is a

collection of the best seventeen papers from the first Management Theory Conference held at the University of the Pacific in San Francisco California on September 27 and 28 2013 The authors of these papers are some of the best management researchers in the world including Anette Mikes Robert S Kaplan and Amy C Edmondson Harvard Business School Sarah Harvey University College London Randall S Peterson London Business School Jack A Goncalo and Verena Krause Cornell University Karen A Jehn University of Melbourne Yally Avrahampour London School of Economics and Political Science Tammy L Madsen Santa Clara University and Sim B Sitkin Duke University All of the papers in this book present the latest theoretical developments that were discussed at the first Management Theory Conference The purpose of the conference was to help address the shortage of new management and organization theories The mission of the conference was to facilitate recognize and reward the creation of new theories that advance our understanding of management and organizations The conference was held to motivate management researchers to create new theories and to provide researchers with a supportive forum where those new theories could be presented discussed and published Chapter Seventeen is the winner of the Wiley Outstanding New Management Theory Award Authors Chris P Long Sim B Sitkin and Laura B Cardinal present a theory to explain the drivers of managerial efforts to promote trust fairness and control They theorize how superior subordinate conflicts stimulate managers concerns about managerial legitimacy and subordinate dependability in performing tasks and hypothesize how managers attempt to address these concerns using trustworthiness promotion fairness promotion and control activities This book also contains written summaries of the two keynote addresses that were given at the conference by Roy Suddaby editor of Academy of Management Review and Jeffrey Pfeffer Stanford University which comprise Chapters Eighteen and Nineteen Professors Suddaby and Pfeffer present a fascinating debate of the future and new directions of management and organization theories Business Without Boundaries Don Mankin, Susan G.

Cohen, 2004-09-24 Traditional forms of collaboration are not sufficient for competing effectively in the more complex and dynamic environment of today's business world Face to face meetings between people of similar backgrounds have given way to increasingly complex working relationships Organizations must be able to gain rapid access to knowledgeable people to meet constantly changing conditions and demands More fluid flexible and easily reconfigurable collaborative relationships are necessary to produce the innovations that can make or break organizations^{3 4} even entire industries^{3 4} and provide the opportunities that attract the talented and motivated employees who will make the difference between success and failure Business Without Boundaries helps managers address these challenges The authors explore a number of wide ranging real world cases to identify hands on principles for successful collaboration They offer managers and executives practical steps and tools for creating facilitating and supporting complex collaborations throughout their organizations And they explain how to team across boundaries in the new global economy The recommendations are specific enough to apply to particular forms of complex collaboration for example supply chains global product development teams interorganizational alliances but

general enough to apply to new forms that have yet to emerge *Virtual Teams* David Pauleen, 2004-01-01 Virtual teams are a new phenomenon and by definition work across time distance and organizations This text gathers academic research on real work based virtual teams It presents practical research insight and advice on how virtual team projects can be better managed

Team Performance in Health Care Gloria D. Heinemann, Antonette M. Zeiss, 2012-12-06 The idea of teamwork in health care emerged at several times during the 20th century as the result of shifts in the nature and demands of health care and societal needs Examples include medical and surgical teams serving the military in World War II primary care teams staffing Community Health Centers created by President Johnson's War On Poverty and geriatric care teams established to serve the rapidly growing number of aging citizens Collaborative teamwork surfaced as a rational solution to health care needs but political and economic consensus to support widespread implementation was lacking The increasing complexity of providing health care seemed best served by the skills and efforts of interdisciplinary teams but such care was viewed as expensive so evaluation of its effectiveness became essential There were major problems in conducting such evaluation however First no clear theory guided the concept and practice of teamwork Early attempts to employ theoretical constructs explaining the behavioral and organizational phenomena of teamwork borrowed from theories of group dynamics communication organizational development and general systems Further few reliable validated instruments existed to evaluate team process function or effectiveness The best early efforts at research and evaluation came from academic centers funded by the Office of Interdisciplinary Programs of the Bureau of Health Professions 1975-78 and from the Veterans Affairs Interprofessional Team Training Development Program

The Psychology and Management of Project Teams François Chiochio, E. Kevin Kelloway, Brian Hobbs, 2015-04-10 Organizations today are increasingly using projects in their daily activities Projects and project management principles frame goal attainment in academia and many business sectors and they even serve as theoretical footing for organizational change endeavors However the ubiquity of project management does not mean that project work project teams and the ways organizations use projects are well understood Moreover while project management theory and practice aim at providing structure and control to enable successful project completion an alarmingly high percentage of projects struggle or fail As the authors of *The Psychology and Management of Project Teams* explain this is in part because projects are still mostly managed as technical systems rather than behavioral systems Even though project management researchers have become increasingly interested in factors that may have an impact on project management effectiveness their efforts fall short of addressing the human factor And unfortunately many project management scholars are largely unaware of the I/O psychology literature relying for example on outdated models of motivation and team development On the other side I/O psychologists who research groups and teams often ignore the contextual influences such as business sector project type placement in the organizational hierarchy and project phase and maturity that have a crucial impact on how a project will unfold In this volume a cross disciplinary set of editors will bring

together perspectives from leading I O psychology and project management scholars The volume will include comprehensive coverage of team selection development learning motivation and communication conflict management and well being leadership diversity performance from a multi level perspective and career development In the concluding chapter a research agenda will provide a roadmap for an integrated approach to the study of project teams Geographically Dispersed Teams

Valerie I. Sessa,1999 Geographically dispersed teams are work groups whose members are separated by time and distance This bibliography summarizes what the current literature has to say about how these teams should be formed developed and led A discussion of the key themes in the literature is followed by over 80 annotations of books journals and World Wide Web resources
