Tears And Stone:

Stone Jeffrey Jerome Cohen, 2015-05-06 Stone maps the force vivacity and stories within our most mundane matter stone For too long stone has served as an unexamined metaphor for the really real blunt factuality nature's curt rebuke Yet medieval writers knew that stones drop with fire from the sky emerge through the subterranean lovemaking of the elements tumble along riverbeds from Eden partner with the masons who build worlds with them Such motion suggests an ecological enmeshment and an almost creaturely mineral life Although geological time can leave us reeling Jeffrey Jerome Cohen argues that stone's endurance is also an invitation to apprehend the world in other than human terms Never truly inert stone poses a profound challenge to modernity's disenchantments Its agency undermines the human desire to be separate from the environment a bifurcation that renders nature out there a mere resource for recreation consumption and exploitation Written with great verve and elegance this pioneering work is notable not only for interweaving the medieval and the modern but also as a major contribution to ecotheory Comprising chapters organized by concept Geophilia Time Force and Soul Cohen seamlessly brings together a wide range of topics including stone's potential to transport humans into nonanthropocentric scales of place and time the petrification of certain cultures the messages fossils bear the architecture of Bordeaux and Montparnasse Yucca Mountain and nuclear waste disposal the ability of stone to communicate across millennia in structures like Stonehenge and debates over whether stones reproduce and have souls Showing that what is often assumed to be the most lifeless of substances is in its own time restless and forever in motion Stone fittingly concludes by taking us to Iceland a land that writes the author reminds us that stone like water is alive that stone like water is transient *The Book of Stones, Revised Edition* Robert Simmons, Naisha Ahsian, 2015-03-10 Often dubbed the crystals bible this comprehensive reference guide to the spiritual and healing qualities of 455 sacred stones has become the go to book for looking up the properties of gems and minerals Each entry includes vivid color photographs for each stone to aid identification and to showcase its beauty as well as listing its scientific information its element and chakra correspondences and the physical emotional and spiritual benefits of each stone Illustrated by gorgeously lit clear color photos to aid quick identification the book offers an illuminating alphabetical journey through the mineral kingdom stone by stone This new edition of *The Book of Stones* the best selling guide to some of Earth's most beautiful natural objects is revised to include 76 new entries The book begins with two introductory chapters detailing advice by authors Naisha Ahsian and Robert Simmons on how to work with crystals and stones including the concept of crystal resonance and the scientific observation that living organisms such as ourselves are liquid crystalline structures Each entry begins with the stone name and photo plus its elemental and chakra correspondences as well as keywords that indicate its properties Next comes a description of the crystal structure hardness history and known locations of each mineral plus any relevant legend or lore from the past Each author then offers their own take and personal insights on the subtle energy properties and spiritual applications of the stone The entries conclude with summaries of the

spiritual emotional and physical healing qualities of the stone and an affirmation for evoking its potential benefits The book's presentation is straightforward enough to make it an excellent introduction for beginners yet the level of detail and the depth of research make it an invaluable resource for the most experienced stone practitioners

Natural Materials of the Holy Land and the Visual Translation of Place, 500-1500 Renana Bartal, Neta Bodner, Bianca Kuhnel, 2017-04-21 Natural Materials of the Holy Land and the Visual Translation of Place 500-1500 focuses on the unique ways that natural materials carry the spirit of place Since early Christianity wood earth water and stone were taken from *loca sancta* to signify them elsewhere Academic discourse has indiscriminately grouped material tokens from holy places and their containers with architectural and topographical emulations two dimensional images and bodily relics However unlike textual or visual representations natural materials do not describe or interpret the Holy Land they are part of it Tangible and timeless they realize the meaning of their place of origin in new locations What makes earth stones or bottled water transported from holy sites sacred How do they become *pars pro toto* signifying the whole from which they were taken This book will examine natural media used for translating *loca sancta* the processes of their sanctification and how although inherently abstract they become charged with meaning It will address their metamorphosis natural or induced how they change the environment to which they are transported their capacity to translate a static and distant site elsewhere the effect of their relocation on users viewers and how their containers and staging are used to communicate their substance
