The Technical Development of Modern Aviation Ronald E. Miller, David Sawers, 1968 Beskriver den historiske udvikling inden for flykonstruktioner og lufttransport herunder passagerflyvning *The Technical Development of Modern Aviation* Ronald E. Miller, David Sawers, 1970 **Proceeding's of the Military History Symposium, USAF Academy** United States. Air Force, 1979 **Air power and warfare the proceedings of the 8th Military History Symposium United States Air Force Academy 18-20 October 1978**, *A History of Aerodynamics* John David Anderson, John D. Anderson, Jr, 1998 From the Foreword John Anderson s book represents a milestone in aviation literature For the first time aviation enthusiasts both specialists and popular readers alike possess an authoritative history of aerodynamic theory Not only is this study authoritative it is also highly readable and linked to the actual and more familiar story of how the airplane evolved The book touches on all the major theorists and their contributions and most important the historical context in which they worked to move the science of aerodynamics forward Von Hardesty Smithsonian Institution From the reviews Something of the unexpected quality of this book can be inferred from its full title A History of Aerodynamics and Its Impact on Flying Machines Pilots tend to suppose that the science of aerodynamics began empirically somewhere around the time of Lilienthal and the Wrights and that aerodynamics and manned flight are roughly coeval It is therefore surprising to come upon a photograph of the Wright Flyer as late as page 242 of the 478 page volume Peter Garrison Flying This book successfully straddles the boundary that separates a text book from a history book It is of equal interest to both the aerodynamicist and the layman The textual balance achieved by the author has resulted in a book that is enjoyable and educational Earl See American Aviation Historical Society Newsletter **Air Power and Warfare** Alfred F. Hurley, Robert C. Ehrhart, 1979 **Airwar** Phillip S. Meilinger, 2003 These essays cover a wide range of subjects and tell the story of air power s evolution over the past century *The American Military on the Frontier* James P. Tate, 1978 **Impact of Advanced Air Transport Technology** United States. Congress. Office of Technology Assessment, 1980 *The World Aircraft Industry* Daniel Todd, Jamie Simpson, 2019-08-13 Aircraft building is a major industry for many developed countries This book first published in 1986 provides a comprehensive survey of the state of the world aircraft industry It looks at how the industry developed and at its problems It examines the role of governments showing how this differs from country to country It concludes by assessing the prospects for the future shape of the industry particularly as newly industrialised countries become more involved
