Modern Architecture Alan Colquhoun,2002-04-25 This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures The work of the main architects of the movement such as Frank Lloyd Wright Adolf Loos Le Corbusier and Mies van der Rohe is re examined shedding new light on their roles as acknowledged masters Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of form function social engagement modernity and tradition Translucent Building Skins Scott Murray,2013-05-07 Exploring the design of innovative building enclosure systems or skins in contemporary architecture and their precedents in earlier twentieth century modern architecture this book examines the tectonics the history and the influence of translucency as a defining characteristic in architecture Highly illustrated throughout with drawings and full colour photographs the book shows that translucency has been and continues to be a fertile ground for architectural experimentation Each chapter presents a comparative analysis of two primary buildings a recent project paired with a historical precedent highlighting how architects in different eras have realized the distinctive effects of translucency The included buildings span a variety of program types ranging from a single family residence to a factory to a synagogue Whether it is Pierre Chareau s glass lens curtain wall at the Maison de Verre Frank Lloyd Wright s wall of stacked glass tubes at the Johnson Wax Research Tower or Peter Zumthor s use of acid etched glass in a double skin envelope at the Kunsthhaus Bregenz the included projects each offer an exemplary case study of innovations in materiality and fabrication techniques Today among many contemporary architects there is an engagement with new technologies new material assemblies and new priorities such as sustainability and energy efficiency A resurgent interest in translucency as a defining quality in buildings has been an important part of this recent dialogue and this book makes essential reading for any architect looking to incorporate aspects of translucency into their buildings *Waterfronts Revisited* Heleni Porfyriou,Marichela Sepe,2016-08-05 *Waterfronts Revisited* addresses the historical evolution of the relationship between port and city and re examines waterfront development by looking at the urban territory and historical city in their complexity and entirety By identifying guiding values urban patterns and typologies and local needs and experiences cities can break the isolation of the harbor by reconnecting it to the urban structure its functions spaces and forms Using the UNESCO recommendation for the Historic Urban Landscape as the guiding concept and a tool for managing urban preservation and change this collection of essays illustrates solutions to issues of globalisation commercialization of space and commoditisation of culture in waterfront development Through sixteen selected case studies Editors Heleni Porfyriou and Marichela Sepe offer planners and urban designers a broad spectrum of alternative solutions to waterfront regeneration interventions and redevelopments addressing sustainability regional cultural diversity and the debate between

conservation and transformation **Architecture and Design at the Museum of Modern Art** Thomas S.

Hines, 2019-01-22 A comprehensive and fascinating look at the history of the Museum of Modern Art's Architecture and Design Department under the leadership of the influential curator Arthur Drexler. Arthur Drexler 1921-1987 served as the curator and director of the Architecture and Design Department at the Museum of Modern Art (MoMA) from 1951 until 1986, the longest curatorship in the museum's history. Over four decades, he conceived and oversaw trailblazing exhibitions that not only reflected but also anticipated major stylistic developments. Although several books cover the roles of MoMA's founding director Alfred Barr and the department's first curator Philip Johnson, this is the only in-depth study of Drexler, who gave the department its overall shape and direction. During Drexler's tenure, MoMA played a pivotal role in examining the work and confirming the reputations of twentieth-century architects, among them Frank Lloyd Wright, Le Corbusier, Richard Neutra, Marcel Breuer, and Ludwig Mies van der Rohe. Exploring unexpected subjects from the design of automobiles and industrial objects to a reconstruction of a Japanese house and garden, Drexler's boundary pushing shows promoted new ideas about architecture and design as modern arts in contemporary society. The department's public and educational programs projected a culture of popular accessibility, offsetting MoMA's reputation as an elitist institution. Drawing on rigorous archival research as well as author Thomas S. Hines's firsthand experience working with Drexler, *Architecture and Design at the Museum of Modern Art* analyzes how MoMA became a touchstone for the practice and study of midcentury architecture.

Architecture under Construction Stanley Greenberg, 2010-04-15 Mies van der Rohe once commented, "Only skyscrapers under construction reveal their bold constructive thoughts, and then the impression made by their soaring skeletal frames is overwhelming." Never has this statement resonated more than in recent years, when architectural design has undergone a radical transformation and when powerful computers allow architects and engineers to design and construct buildings that were impossible just a few years ago. At the same time, what lies underneath these surfaces is more mysterious than ever before. In *Architecture under Construction*, photographer Stanley Greenberg explores the anatomy and engineering of some of our most unusual new buildings, helping us to understand our own fascination with what makes buildings stand up and what makes them fall down. As designs for new constructions are revealed and the public watches closely as architects and engineers challenge each other with provocative new forms and equally audacious ideas, Greenberg captures penetrating images that reveal the complex mystery and beauty found in the transitory moments before the skin of a building covers up the structures that hold it together. Framed by a historical and critical essay by Joseph Rosa and including an afterword by the author, the eighty captivating and thought-provoking images collected here focus on some of the most high-profile design projects of the past decade, including buildings designed by Norman Foster, Frank Gehry, Steven Holl, Daniel Libeskind, Thom Mayne, and Renzo Piano, among others, not to be missed by anyone with an eye for the almost invisible mechanisms that continue to define our relationship with the built world. *Modern Architecture and Other Essays* Vincent Scully, 2003

Combining the modes of historian and critic in unique and compelling ways Scully has profoundly influenced the way architecture is thought about and made This illustrated and elegantly designed volume distills Scully s incalculable contribution 300 illustrations Gordon Bunshaft and SOM Nicholas Adams,2019-10-11 This nuanced portrait of Gordon Bunshaft and his work for the architecture firm SOM explores his role in defining the built aesthetic of corporate America

A Critical History of Contemporary Architecture Elie G. Haddad,David Rifkind,2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects

Air-Conditioning in Modern American Architecture, 1890-1970 Joseph M. Siry,2021-02-01 Air Conditioning in Modern American Architecture 1890 1970 documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic In doing so it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project Tracing the development and architectural integration of air conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s Joseph M Siry shows how the incorporation of mechanical systems into

modernism's discourse of functionality profoundly shaped the work of some of the movement's leading architects such as Dankmar Adler, Louis Sullivan, Frank Lloyd Wright, Ludwig Mies van der Rohe, Gordon Bunshaft, and Louis Kahn. For them, the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating, cooling, ventilating, and artificial lighting. Bridging the history of technology and the history of architecture, Siry discusses air conditioning's technical and social history and provides case studies of buildings by the master architects who brought this technology into the conceptual and formal project of modernism. A monumental work by a renowned expert in American modernist architecture, this book asks us to see canonical modernist buildings through a mechanical engineering-oriented lens. It will be especially valuable to scholars and students of architecture, modernism, the history of technology, and American history. *Imagining the Modern* Rami el Samahy, Chris Grimley, Michael Kubo, 2019-05-28

Imagining the Modern explores Pittsburgh's ambitious modern architecture and urban renewal program that made it a gem of American postwar cities and set the stage for its stature today. In the 1950s and 60s, an ambitious program of urban revitalization transformed Pittsburgh and became a model for other American cities. Billed as the Pittsburgh Renaissance, this era of superlatives: the city claimed the tallest aluminum-clad building, the world's largest retractable dome, the tallest steel structure developed through visionary mayors and business leaders, powerful urban planning authorities, and architects and urban designers of international renown, including Frank Lloyd Wright, I. M. Pei, Mies van der Rohe, SOM, and Harrison Abramovitz. These leaders, civic groups, and architects worked together to reconceive the city through local and federal initiatives that aimed to address the problems that confronted Pittsburgh's postwar development. Initiated as an award-winning exhibition at the Carnegie Museum of Art in 2014, *Imagining the Modern* untangles this complicated relationship with modern architecture and planning through a history of Pittsburgh's major sites, protagonists, and voices of intervention. Through original documentation, photographs, and drawings, as well as essays, analytical drawings, and interviews with participants, this book provides a nuanced view of this crucial moment in Pittsburgh's evolution. Addressing both positive and negative impacts of the era, *Imagining the Modern* examines what took place during the city's urban renewal era, what was gained and lost, and what these histories might suggest for the city's future. *Twentieth Century Architecture* Dennis Sharp, 2002

Fully documented, richly illustrated guide to the great architectural achievements of the last one hundred years. *Modernism and American Mid-20th Century Sacred Architecture* Anat Geva, 2018-10-08

Mid-20th century sacred architecture in America sought to bridge modernism with religion by abstracting cultural and faith traditions and pushing the envelope in the design of houses of worship. Modern architects embraced the challenges of creating sacred spaces that incorporated liturgical changes, evolving congregations, modern architecture, and innovations in building technology. The book describes the unique context and design aspects of the departure from historicism and the renewal of heritage and traditions with ground-breaking structural features, deliberate optical effects, and modern aesthetics. The contributions from a pre-eminent group of scholars and practitioners from the US

Australia and Europe are based on original archival research historical documents and field visits to the buildings discussed
