Both volume divided in twenty three sections, all sections and chapters are most important. Tuberculosis, the number one treatable condition, has been extensively covered, and special topics such as multi-drug resistance, directly observed therapy, TB prevention, nonpharmacologic approaches, and extrapulmonary tuberculosis are particularly relevant. Many countries are facing a growing burden of noncommunicable respiratory diseases. These problems are addressed, and measures of prevention such as smoking cessation are included. Other special challenges including topics such as indoor and outdoor air pollution, climate change, poisoning with pesticides, snakebite toxicity, pulmonary manifestations of tropical infections, and industrial accidents such as the tragedy seen in Bhopal, Madhya Pradesh, with methyl isocyanate have been well covered.
