Sleuthing Fossils:

Sleuthing Fossils Alan M. Cavanaugh, 1990-01-16 Introduces the world of investigating fossils examines the value of fossils how to identify them and the research techniques and offers career advice on how to enter the field **Gaither's Dictionary of Scientific Quotations** Carl C. Gaither, Alma E. Cavazos-Gaither, 2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics *Dinosaurs* David E. Fastovsky, David B. Weishampel, 2016-11-28 The ideal textbook for non science majors this lively and engaging introduction encourages students to ask questions assess data critically and think like a scientist Building on the success of the previous editions *Dinosaurs* has been reorganised and extensively rewritten in response to instructor and student feedback It continues to make science accessible and relevant through its clear explanations and extensive illustrations Updated to reflect recent fossil discoveries and to include new taxa the text guides students through the dinosaur groups emphasising scientific concepts rather than presenting endless facts It is grounded in the common language of modern evolutionary biology phylogenetic systematics so that students examine dinosaurs as professional paleontologists do The key emerging theme of feathered dinosaurs and the many implications of feathers have been integrated throughout the book highlighted by the inclusion of stunning new photographs in this beautifully illustrated text now in full colour throughout **The Evolution and Extinction of the Dinosaurs** David E. Fastovsky, David B. Weishampel, 2005-02-07 This 2005 edition of *The Evolution and Extinction of the Dinosaurs* is a unique comprehensive treatment of this fascinating group of organisms It is a detailed survey of dinosaur origins their diversity and their eventual extinction The book can easily be used as a teaching textbook for a class but it is also written as a series of readable entertaining essays covering important and timely topics appealing to non specialists and all dinosaur enthusiasts birds as living dinosaurs the new feathered dinosaurs from China warm bloodedness Along the way the reader learns about dinosaur functional morphology physiology and systematics using cladistic methodology in short how professional paleontologists and dinosaur experts go about their work and why they find it so rewarding The book is spectacularly illustrated by John Sibbick a world famous illustrator of dinosaurs commissioned exclusively for this book Short-Short Stories Alan M. Cavanaugh, 2010-05 *Short Short Stories for Readers Short of Time* is a compilation of 61 ultra short stories two pages or less in length These are in marked contrast to regular short stories that average 12 to 16 pages and may extend to a whopping 30 to 40 pages If you're like the author you're especially open to brief jolts of literature that consume only a few minutes or even less each In our fast paced society economy of words while

reading and writing is correspondingly appropriate. Snatch a sampling of stories when riding on short duration bus train and car trips waiting for a dentist or physician and maybe even while on a commode. A re read of a story may provide an added benefit. In this book you will find the short short stories to be highly varied. Read about a woman having to learn wildflower names from her fiancée, the dwarf planet Pluto's complaint of losing its planet's status, a snake fearing a woman who prefers her snakes having legs, and a nearly 80 year old fiddler worried about contracting AIDS from bad blood during bypass surgery. The photographs are meant to complement the stories. But they can be appreciated on their own merits. You will note that their titles differ from those of the stories.

Literature & Science Breakthroughs Jo-Anne Lake, 2000. *Literature & Science Breakthroughs* offers strategies for using fiction and non fiction to bring all aspects of science to life for children.

BACK COVER

Mesozoic Murder Christine Gentry, 2024-04-02. Gentry's appealing heroine who gets ample opportunity to display her resourcefulness and fortitude and the intriguing milieu in which she operates should ensure both a warm reception and a speedy encore.

Publishers Weekly: Ansel Phoenix draws dinosaurs for magazines, books, and museum displays. But one morning digging with students out in the field, she unearths the body of colleague and ex-lover Nick Capos. Shocked and grieved over the murder and not trusting the Big Toe police who've an axe to grind with her father, Ansel decides to investigate what Capos had been doing during the last few months of his life. She soon suspects he was working on a secret, possibly illegal project worth killing for. Her list of possible suspects grows by the hour as someone starts stalking her across the Montana landscape, a master predator who will stop at nothing. Why is Nick's fossil collection missing and why had he developed a recent interest in Baltic amber? Ansel must also deal with the challenges of her own half-Anglo half-Blackfoot heritage with her ranching family and the changes threatening their rural community and with more than one Mesozoic mystery.

Fossil Detective Joyce Pope, 1994. Discusses the nature and origin of fossils, the collection and study of them, and what they can tell us about creatures of the past.

Beyond Science Standards Charles R. Ault Jr., 2021-11-15. *Beyond Science Standards* captures a vision of science education both whimsical and serious. Ranging across examples from elementary to university level classrooms and grounded in philosophy and history, the stories address dimensions beyond the realm of bureaucratic standards. Its thesis brings into question the premise of scientific unity and its representation in school as notions of method, process, nature, and practice. Schools no less than the sciences profit from playful exploration of musical instruments in fourth grade, physical science for example, and hotel lobby decorative rock in a college geology course. Aesthetic expression permeates geologic interpretation and evolutionary insight in depicting dentition for instance in the history of the horse family and linking this history to changing landscapes. Participating in collecting local high altitude weather data enhances trust in climate science, especially when the observations benefit the local farming community. Allied with historical examples of the conduct of science, *Beyond Science Standards* offers the reader inspiring stories of science teaching varying from place to place, time to time, discipline to discipline, and purpose to purpose.
