By John Anthony Gilvey,2005-11 During the Golden Age of the Broadway musical few director choreographers could infuse a new musical with dance and movement in quite the way Gower Champion could From his earliest Broadway success with Bye Bye Birdie to his triumphant and bittersweet valedictory 42nd Street musicals directed by Champion filled the proscenium with life At their best they touched the heart and stirred the soul with a skillful blend of elegance and American showmanship He began his career as one half of America s Youngest Dance Team with Jeanne Tyler and later teamed with his wife dance partner and longtime collaborator Marge Champion This romantic ballroom duo danced across America in the smartest clubs and onto the television screen performing story dances that captivated the country They ultimately took their talent to Hollywood where they starred in the 1951 remake of Show Boat Lovely to Look At and other films But Broadway always called to Champion and in 1959 he was tapped to direct Bye Bye Birdie The rest is history In shows like Birdie Carnival Hello Dolly I Do I Do Sugar and 42nd Street luminaries such as Chita Rivera Dick Van Dyke Carol Channing Mary Martin Robert Preston Tony Roberts Robert Morse Tammy Grimes and Jerry Orbach brought Champion s creative vision to life Working with composers and writers like Jerry Herman Michael Stewart Charles Strouse Lee Adams and Bob Merrill he streamlined the musical making it flow effortlessly with song and dance from start to finish John Gilvey has spoken with many of the people who worked with Champion and in Before the Parade Passes By he tells the life story of this most American of Broadway musical director choreographers from his early days dancing with Marge to his final days spent meticulously honing the visual magic of 42nd Street Before the Parade Passes By is the life story of one man who personified the glory of the Broadway musical right up until the moment of his untimely death When the curtain fell to thunderous applause on the opening night of 42nd Street August 25 1980 legendary impresario David Merrick came forward silenced the audience and announced that Champion had died that morning As eminent theatre critic Ethan Mordden has firmly put it the Golden Age was over Though the Golden Age of the Broadway musical is over John Gilvey brings it to life again by telling the story of Gower Champion one of its most passionate and creative legends Becoming Mead Daniel R. Huebner,2014-10-10 George

Herbert Mead is a foundational figure in sociology best known for his book Mind Self and Society which was put together after his death from course notes taken by stenographers and students and from unpublished manuscripts Mead however never taught a course primarily housed in a sociology department and he wrote about a wide variety of topics far outside of the concerns for which he is predominantly remembered including experimental and comparative psychology the history of

science and relativity theory In short he is known in a discipline in which he did not teach for a book he did not write In *Becoming Mead* Daniel R Huebner traces the ways in which knowledge has been produced by and about the famed American philosopher Instead of treating Mead s problematic reputation as a separate topic of study from his intellectual biography Huebner considers both biography and reputation as social processes of knowledge production He uses Mead as a case study and provides fresh new answers to critical questions in the social sciences such as how authors come to be considered canonical in particular disciplines how academics understand and use others works in their research and how claims to authority and knowledge are made in scholarship *Becoming Mead* provides a novel take on the history of sociology placing it in critical dialogue with cultural sociology and the sociology of knowledge and intellectuals *A Purdue Icon* James L. Mullins,2019-07-15 The former Purdue Power Plant HPN with its iconic smoke stack and the attached Engineering Administration Building ENAD at the very heart of campus played important roles for most of the twentieth century To many Purdue students and alumni the smoke stack not only symbolized the emphasis at Purdue on technology but also provided a visible marker for the Purdue campus The smoke stack was lovingly referred to by many as Purdue s finger to the world Amid controversy the smoke stack was demolished in the early 1990s when the Purdue Clock Tower was constructed to locate the campus on the landscape *A Purdue Icon* Creation Life and Legacy is an edited volume that speaks to the history of the Power Plant from the initial need for increased power and heat to meet a growing campus demand and its Romanesque architecture that allowed it to fit contextually on the campus to the people who worked to bring heat and power to the campus by keeping the boilers up and the students who experienced the principles and applications of mechanical engineering through active learning This book tells the story of the transition to alternative power and heat sources at the University the decommissioning of the Power Plant the controversy about what was to be done with this important site at the heart of the campus and the challenges associated with the Power Plant s potential reuse or demolition The unique problems faced with demolishing a contaminated building in the middle of a major research university campus are insightfully explored before introducing the Thomas S and Harvey D Wilmeth Active Learning Center a potential new Purdue icon **20th-Century Fashion Illustration** Rosemary Torre,2013-07-24 This captivating retrospective explores the social context of fashion with informative text and over 70 striking images Profiles include flappers glamour girls flower children and the modern obsession with celebrity styles Annual Report Orange Memorial Hospital (Orange, N.J.). of Hoover Dam one of the country's most recognizable and far reaching landmarks and its lasting political and environmental effects on the Colorado River and the American West. At the time of its completion in 1936 Hoover Dam was the biggest dam in the world and the largest feat of architecture and engineering in the country, a statement of national ambition and technical achievement. It turned the wild Colorado River into a tame and securely managed water source, transforming millions of acres of desert into farmland while also providing water and power to the fast growing population of the Southwest. The concrete monolith quickly became a symbol of American ingenuity, however its history is laden with contradiction. It provided work for thousands but it was a dangerous project that exploited desperate workers during the Depression. It helped secure the settlement and economies of the Southwest but at the expense of Indigenous peoples and the environment and it created a dependency on the Colorado River's water which is under threat from overuse and climate change. Weaving together elements of engineering, geography and political and socioeconomic history and drawing heavily from unpublished oral histories taken from dam workers and their families, Simon Boughton's thoughtful and compelling debut featuring historical photographs throughout follows the construction and impact of Hoover Dam and how its promise of abundance ultimately created a river in crisis today.
