Becoming Delinquent: British and European Youth, 1650-1950 Pamela Cox, Heather Shore, 2017-11-30 This title was first published in 2002 *Becoming Delinquent British and European Youth 1650 1950* provides a critical synthesis of the growing body of work on the history of British and European juvenile delinquency It is unique in that it analyzes definitions of and responses to disorderly youth across time from the mid seventeenth to the mid twentieth centuries and across space covering developments across Western Europe This comparative approach allows it to show how certain themes dominated European discourses of delinquency across this period not least panics about urban culture poor parenting dangerous pleasures family breakdown national fitness and future social stability It also shows how these various threats were countered by recurring strategies most notably by repeated attempts to deter delinquency to divide responsibility between the state civil society and the family and to find a proper balance between moral reform and physical punishment between care and control

Republicans Wyger Velema, 2007-01-01 The notion of being freeborn republicans bound the eighteenth century Dutch together Yet beneath this general label many fundamental differences existed This book explores the varieties of eighteenth century Dutch republicanism It thereby significantly contributes to our understanding of a crucial period in the development of Dutch political thought

Conventional Correspondence Willemijn Ruberg, 2011-09-09 Egodocuments are cherished because of the view they supposedly provide into the innermost feelings of individuals in past and present Recent research however has shown the complexity of genres like autobiographies diaries and

letters Building on critical and historical research into autobiographical writing this book describes epistolary practices of the Dutch elite in the period 1770 1850 Analysing how cultural ideals of sincerity individuality and naturalness influenced the style and contents of letters the book also addresses the functions of letter writing in family life like the formation of an adolescent identity and the relationship between parents and children Correspondence was a vital means by which class and gender identities were performed and the appropriate emotions were shaped *Trials of the self* Elwin Hofman,2021-04-27 This highly original study brings together the disparate histories of murder and enlightenment prostitution and the cult of nature sodomy and sentimentalism in order to retell the story of the making of the modern self It suggests that the history of the self needs to attend more to its class dimensions and puts this insight into practice by examining the influence of the criminal courts in spreading and negotiating changing ideas of the self Using criminal interrogations and witness statements *Trials of the self* shows that an increasing stress on psychological depth in the late eighteenth and early nineteenth centuries was not only important for elites but also for common and illiterate people sometimes even more so Masculinity and the Other Heather Ellis,Jessica Meyer,2009-01-14 Histories of masculinity have generally examined both social ideologies of masculinity and subjective male identities within frameworks that define them against the feminine Yet historians and sociologists have increasingly argued that men have been and continue to be defined both socially and subjectively as much by their relations to other men as in relation to women This collection brings together the work of scholars of masculinities working in a variety of fields including literature history and art history to examine some of the forms of otherness against which ideas of masculinity have been defined throughout history The collection reflects the current breadth of scholarship relating to the study of masculine alterity While the subjects addressed are largely historical the time span covered is broad and the disciplinary approaches to the subject matter are equally wide ranging A huge variety of men masculine behaviours and definitions of masculinity are considered in an exciting and invigorating collection that showcases both established academics and emerging scholars in the field Music and the City Stefanie Beghein,Bruno Blondé,Eugeen Schreurs,2013-12-13 Although early modern urban musical life has been the object of investigation with several researchers little is known about the ways in which musical cultures were integrated within their broader urban environments Building upon recent trends within urban musicology the authors of this volume aim to transcend descriptive overviews of institutions and actors involved with music within a given city Instead they consider the urban environment as the constitutive context for music making and music as a significant aspect of urban society and identity Through selected case studies and by focusing on three musical circuits opera and theatre music sacred music and secular songs this book contributes to a more effective understanding of music in late seventeenth and eighteenth century urban societies in the southern Netherlands and beyond Musicological and historical research perspectives are fruitfully integrated as well as insights from theatre scholarship and literary criticism With attention to the musical life behind the traditional institutions the circulation of

repertoires and musical cultures in peripheral urban environments or in cities in decay Music and the City sheds new light on the societal dimension of music in urban life Contributors Bruno Blond University of Antwerp Timothy De Paepe University of Antwerp Rudolf Rasch Utrecht University Bruno Forment Free University Brussels Ghent University Stefanie Beghein University of Antwerp Eugeen Schreurs Artesis University College Antwerp Royal Conservatory Tanya Kevorkian Millersville University Anne Madeleine Goulet cole fran aise de Rome Louis P Grijp Utrecht University Meertens Institute
