Speculations Readings In Culture Identity And Values:

Speculations Charles I. Schuster, William V. Van Pelt, 1996 Representing the diversity of American intellectual life this collection of readings by some of today's most prominent authors focuses on contemporary issues and grows out of a multiculturalist approach with selections that examine, analyze and question today's culture and cultural events Substantially revised based on extensive reader and reviewer survey the book comes with more than half of the readings new to this edition Now offers over 50% more selections Addresses significant and provocative themes for readers to discuss read about and write about such as affirmative action children and the media gay lesbian rights date rape and family values For those interested in composition Michael Carter, 2003 **Talking about Identity** Carl E. James, Adrienne Lynn Shadd, 2001

Where are you from What is your nationality I didn't know you were I'm not racist but It's just a joke What does a white person know about racism Some of my best friends are James and Shadd's enormously popular Talking About Difference BTL 1994 has been thoroughly revised and expanded and makes a fine introduction to dozens of key issues involving all of us in Canadian society Some of these issues include ethnic racial class and social identity All the authors provide analysis as well as personal reflections The book also shows the rich experiences and many ways of growing up immigrating to and living in Canada

Values and Development in Southern Africa Hans-Peter Müller, Pinkie Mekingwe, Marvellous Mynard Mhloyi, 2013 Development has been on Africa's agenda for a long time but progress has been both varied and limited partly due to the diverse levels of the discussions on the challenges and the interventions for tackling them Africa's greatest challenge is the uneven development within and between its countries and the pressing issues of extreme poverty in southern Africa and the continent as a whole Poverty causes its victims to suffer social exclusion and political repression In addition societies that experience poverty are also mostly under continuous threat of ecological disasters and diseases This book focuses on the social and cultural dimensions of development dynamics and in particular the role of values in shaping development Values are at the core of the hopes and aspirations of individuals communities and societies The book therefore explains the values that motivate and inform African communities and societies with a view to facilitating a dialogue about sustainable development in Africa among academics intellectuals policy and decisionmakers and the communities themselves

Theorizing Composition Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the

disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works

Critical Social Issues in American Education H. Svi Shapiro, David E. Purpel, 2004-09-22 This text reader brings together powerful readings that critically situate issues of education in the context of the major cultural moral political economic ecological and spiritual crises that confront us as a nation and a global community It provides a focus and a conceptual framework for thinking about education in light of these issues Readers are exposed to the thinking of some of the best and most insightful social and educational commentators Critical Social Issues in American Education Democracy and Meaning in a Globalizing World Third Edition is intended to work on two levels First it helps readers to develop an awareness of how education is connected to the wider social structures of cultural political and economic life Second it encourages not only a critical examination of our present social reality but also a serious discussion of alternatives of what a transformed society and educational process might look like The editors goal is to deliberately engage readers in connecting the work of teachers to an ethically committed politically charged pedagogy The assumption on which they base the text is that educators must see their work as inextricably linked to the broader conflicts stresses and crises of the social world it is not otherwise possible to make sense of what is happening educationally What happens in school or as part of the educational experience reflects expresses and mediates profound questions about the direction and nature of the society we inhabit The text is organized thematically into five sections which address respectively social justice and democracy consumerism culture and public education marginality and difference moral and spiritual perspectives on education and globalization and education Each section is preceded by a brief essay that introduces the readings This Third Edition includes many new readings and addresses issues that have more recently emerged as especially significant such as concerns about the implications of globalization and the post 9 11 world commercialism violence and the ever increasing influence of high stakes testing This compelling text is relevant for a wide range of courses in educational foundations educational policy curriculum studies and multicultural education that address the social context of education cultural and political change and public policy

Worlds of Difference Eleanor Palo Stoller, Rose Campbell Gibson, 2000 This collection of readings presents a variety of perspectives on ageing from different communities across the United States Native American Puerto Rican African American the elderly homeless white working class gay and Mexican amongst many others The readings cover topics such as

life course social and psychological contexts of ageing paid and unpaid activity the American family and health

Speculations Charles I. Schuster, William V. Van Pelt, 1993 Rural Literacies Kim Donehower, Charlotte Hogg, Eileen E Schell, 2007 Rural Literacies identifies the problems inherent in trying to understand rural literacy addresses the lack of substantive research on literacy in rural areas and reviews traditional misrepresentations of rural literacy This innovative volume frames debates over literacy in relation to larger social political and economic forces such as the impact of the No Child Left Behind Act on rural schools and the effects of out migration globalization and the loss of small family farms on rural communities Drawing upon traditional literacy and composition research and employing theory from education and sociology the text engages compositionists in broader conversations regarding rural literacies The authors share strategies that will help compositionists participate in pedagogies that are rooted in a richer understanding of rural literacies and work toward sustainability for all communities in a globalized age **The Construction of Children's Character** Alex Molnar, 1997 This volume provides an analysis of approaches to moral education in the 1960s and 1970s and then moves to a description and analysis of more contemporary efforts that characterize the current movement for character education It becomes clear however that the current movement is a misnomer for there are marked differences today among those who are concerned with the moral and character development of children And there are others who are critical of the idea that schools should be involved in character education at all
