Language and Social Interaction Jennifer Mandelbaum, 2003-01-30 This collection offers empirical studies and theoretical essays about human communication in everyday life. The writings come from many of the world's leading researchers and cut across academic boundaries engaging scholars and teachers from such disciplines as communication sociology anthropology linguistics and education. Chapters emphasize empirical qualitative studies of people's everyday uses of talk in interaction and they feature work in such areas as sociolinguistics conversation analysis discourse analysis and ethnography. The volume is dedicated to and highlights themes in the work of the late Robert Hopper an outstanding scholar in communication who pioneered research in Language and Social Interaction LSI. The contributors examine various features of human interaction such as laughter vocal repetition and hand gestures occurring naturally within a variety of settings at a dinner table a doctor's office an automotive repair shop and so forth whereby interlocutors accomplish aspects of their interpersonal or institutional lives resolve a disagreement report bad medical news negotiate a raise and more all of which may relate to larger social issues including police brutality human spirituality death and optimism. The chapters in this anthology show that social life is largely a communicative accomplishment and that people constitute the social realities experienced every day through small and subtle ways of communicating carefully orchestrated but commonly taken for granted. In showcasing the diversity of contemporary LSI research this volume is appropriate for scholars and graduate students in language and social interaction communication sociology research methods qualitative research methods discourse analysis conversation analysis linguistics and related areas.

Social Interaction Michael Argyle, 2017-09-29 This is the first book length work to reflect the recent trend in social psychology away from artificial laboratory test results. It focuses directly on the detailed concrete elements of social behavior as they are observed in a real life setting. Michael Argyle's approach here differs from that more generally taken in two respects. First he discusses human interaction in terms of the basic elements of behavior bodily and facial movements gestures eye movements facial expression proximity and orientation the verbal and non verbal aspects of communication. Second he has drawn on research in such varied areas as psychiatry anthropology linguistics ethology developmental and organizational psychology as well as on his own extensive experimental studies. Particular emphasis is given to the biological roots of interaction and to its cultural setting. Social Interaction demonstrates a strong awareness of the current theories of social psychology while restricting itself in exposition to the observable aspects of human interaction. The result is a comprehensive and stimulating introduction to social interaction. This is primarily a textbook for students of social psychology but it covers a field that is of central importance for all students of the social and biological sciences.
