**Spring Flowers, Spring Frost** Ismail Kadare, 2011-11-11 In a small town at the foot of the northern highlands in Albania a decade after the fall of the Communist regime the harsh blood for blood law of the fearsome Kanun mountain folk is emerging from hibernation like everything else that was forbidden under the fifty years of Communist rule Mysterious happenings that are two thousand years old two centuries old or even just two years old reemerge in daily life The marriage of a girl and a snake is not just a legend but a news item a cyclical event that is as much part of the modern world as of the ancient one Set against this Kafkaesque backdrop a simple and sensual love story between a painter and a young woman stands out as light against dark With its rich and somber story of local traditions and universal themes **Spring Flowers Spring Frost** is a masterpiece belonging to Kadare's purest classical vein

Doonan, 2018-08-16 As a consequence of the global climate change both the reduction on yield potential and the available surface area of cultivated species will compromise the production of food needed for a constant growing population There is consensus about the significant gap between world food consumption projected for the coming decades and the expected crop yield improvements which are estimated to be insufficient to meet the demand The complexity of this scenario will challenge breeders to develop cultivars that are better adapted to adverse environmental conditions therefore incorporating a new set of morpho physiological and physico chemical traits a large number of these traits have been found to be linked to heat and drought tolerance Currently the only reasonable way to satisfy all these demands is through acquisition of high dimensional phenotypic data high throughput phenotyping allowing researchers with a holistic comprehension of plant responses or Phenomics Phenomics is still under development This Research Topic aims to be a contribution to the progress of methodologies and analysis to help understand the performance of a genotype in a given environment **Natural**
