Spying from Space David Christopher Arnold,2008-06-12 On August 14 1960 a revolution quietly occurred in the reconnaissance capabilities of America When the Air Force C 119 Flying Boxcar Pelican 9 caught a bucket returning from space with film from a satellite the American intelligence community gained access to previously denied information about the Soviet Union The Corona reconnaissance satellite missions that followed lifted the veil of secrecy from the communist bloc revealing among other things that no Missile Gap existed This revolution in military intelligence could not have occurred without the development of the command and control systems that made the Space Race possible In *Spying from Space* David Christopher Arnold tells the story of how military officers and civilian contractors built the Air Force Satellite Control Facility AFSCF to support the National Reconnaissance Program The AFSCF also had a unique relationship with the National Reconnaissance Office a secret organization that the U S government officially concealed as late as the 1990s Like every large technology system the AFSCF evolved as a result of the interaction of human beings with technology and with each other *Spying from Space* fills a gap in space history by telling the story of the command and control systems that made rockets and satellites useful Those interested in space flight or intelligence efforts will benefit from this revealing look into a little known aspect of American achievement Those fascinated by how large complex organizations work will also find this an intriguing study of inter service rivalries and clashes between military and civilian cultures

Eyeing the Red Storm Robert M. Dienesch,2016-04 In 1954 the U S Air Force launched an ambitious program known as WS 117L to develop the world s first reconnaissance satellite The goal was to take photographic images from space and relay them back to Earth via radio Because of technical issues and bureaucratic resistance however WS 117L was seriously behind schedule by the time Sputnik orbited Earth in 1957 and was eventually cancelled The air force began concentrating instead on new programs that eventually launched the first successful U S spy satellites *Eyeing the Red Storm* examines the birth of space based reconnaissance not from the perspective of CORONA the first photo reconnaissance satellite to fly but rather from that of the WS 117L Robert M Dienesch s revised assessment places WS 117L within the larger context of Dwight D Eisenhower s presidency focusing on the dynamic between military and civilian leadership Dienesch demonstrates how WS 117L promised Eisenhower not merely military intelligence but also the capacity to manage national security against the

Soviet threat As a fiscal conservative Eisenhower believed a strong economy was the key to surviving the Cold War and saw satellite reconnaissance as a means to understand the Soviet military challenge more clearly and thus keep American defense spending under control Although WS 117L never flew it provided the foundation for all subsequent satellites breaking theoretical barriers and helping to overcome major technical hurdles which ensured the success of America's first working reconnaissance satellites and their photographic missions during the Cold War Purchase the audio edition Satellite Surveillance Richard A. Best, 2010-11 Reconnaissance satellites RS first deployed in the 1960s to peer into the Soviet Union and other secretive enemy states have also been used by civilian agencies of the fed gov't to assist with mapping disaster relief and environ concerns Post 9/11 the Bush Admin encouraged use of satellite derived data for homeland security and law enforce purposes in addition to the civil applications This report provides background on the development of RS and identifies the roles various agencies play in their management and use Also a discussion of legal considerations including whether RS might constitute a search within the meaning of the 4th Amendment an overview of statutory authorities as well as restrictions that might apply
