consult with high ranking governmental officials about the prospects for a major starquake in 05 He tours one of over one hundred American underground mini cities that were built in the preceding decade based on his scientific predictions and is astounded by the realization that NASA and Dr DeFazio were following up massively on his predictions of doom even as they were attacking him in public The magnetar strikes almost immediately after the high level briefing and before he and DeFazio can reignite their relationship Templeton is trapped in DC but manages to return home after a harrowing cross country trip across a dystopian America in the initial stages of societal collapse After two hundred years the restoration of the magnetic shield leads a small number of underground survivors to eventually resurface to a feudal world of warring tribes
