Swinburne A Selection:

Swinburne Rudolf Borchardt, 1919 **Swinburne, a Selection. Compiled and with an Introduction by Edith Sitwell** Algernon Charles Swinburne, Edith Sitwell, 1960 The Athenaeum, 1894 **Athenaeum** James Silk Buckingham, John Sterling, Frederick Denison Maurice, Henry Stebbing, Charles Wentworth Dilke, Thomas Kibble Hervey, William Hepworth Dixon, Norman Maccoll, Vernon Horace Rendall, John Middleton Murry, 1894 **A.C. Swinburne and the Singing Word** Yisrael Levin, 2016-03-16 Focusing on Algernon Charles Swinburne's later writings this collection makes a case for the seriousness and significance of the writer's mature work While Swinburne's scandalous early poetry has received considerable critical attention the thoughtful rich spiritually and politically informed poetry that began to emerge in his thirties has been generally neglected This volume addresses the need for a fuller understanding of Swinburne's career that includes his fiction aesthetic ideology and analyses of Shakespeare and the great French writers Among the key features of the collection is the contextualizing of Swinburne's work in new contexts such as Victorian mythography continental aestheticism positivism and empiricism Individual essays examine among other topics the dialect poems and Swinburne's position as a regional poet Swinburne as a transition figure from nineteenth century aesthetic writing to the professionalized criticism that dominates the twentieth century Swinburne's participation in the French literary scene Swinburne's friendships with women writers and the selections made for anthologies from the nineteenth century to the present Taken together the essays offer scholars a richer portrait of Swinburne's importance as a poet critic and fiction writer **A Selection [of the Poems Of] (Swinburne.)** Algernon Charles Swinburne, 1960 **The New Statesman**, 1920

Swinburne's Hell and Hick's Universalism Lindsey Hall, 2017-11-01 This title was first published in 2003 This book seeks to establish whether a Christian position must entail a belief in hell or whether Christians can hold a coherent theory of universal salvation Richard Swinburne's defence of hell depends on the argument that hell is necessary if humans are to be genuinely free It becomes clear that the contemporary discussion of hell and universalism cannot be separated from the issues of human freedom and God's knowledge and so Hall centres the discussion round the question Are we Free to Reject God John Hick argues that although we are free to reject God there will eventually be an universalist outcome Having examined the contrasting arguments of Hick and Swinburne Hall builds on Hick's position to develop an argument for Christian universal salvation which holds in balance our freedom in relation to God and the assurance that all will finally be saved **Swinburne's poetics** Meredith B. Raymond, 2019-03-18 No detailed description available for Swinburne's poetics

Swinburne's Theory of Poetry Thomas E. Connolly, 1965-06-30 Charles Algernon Swinburne's literary reputation rests almost exclusively upon his poetry and though his critical writings were voluminous they are usually slighted by literary historians Examinations of Swinburne's aesthetic principles too are generally based upon interpretations of his poetry though these may be as misleading as the discrepancies between other artists principles and practices Believing that a solid and

consistent core of poetic theory underlay all of Swinburne's critical essays, casual pieces and letters. Professor Connolly has attempted to reconstruct the theory from a careful analysis of this body of writing. In this book he sets forth his findings as general principles and as they apply to lyric and dramatic poetry. Swinburne was a far sounder and more consistent critic than he is usually given credit for being. Professor Connolly concludes and the various critical principles that can be discovered in his essays hang together in a more integrated theory of poetry than is usually imagined. He had, as other critics had, a number of basic principles and themes that he used with astonishing versatility in his criticism. The successful poet who is also a critic usually has a valuable contribution to make to the general understanding and appreciation of poetry.

Swinburne in this respect was not an exception. **Algebraic Art** Andrea K. Henderson, 2018-04-05. Algebraic Art explores the invention of a peculiarly Victorian account of the nature and value of aesthetic form and it traces that account to a surprising source: mathematics. The nineteenth century was a moment of extraordinary mathematical innovation, witnessing the development of non-Euclidean geometry, the revaluation of symbolic algebra, and the importation of mathematical language into philosophy. All these innovations sprang from a reconception of mathematics as a formal rather than a referential practice, as a means for describing relationships rather than quantities. For Victorian mathematicians, the value of a claim lay not in its capacity to describe the world but in its internal coherence. This concern with formal structure produced a striking convergence between mathematics and aesthetics: geometers wrote fables, logicians reconceived symbolism, and physicists described reality as consisting of beautiful patterns. Artists, meanwhile, drawing upon the cultural prestige of mathematics, conceived their work as a science of form, whether as lines in a painting, twinned characters in a novel, or wavelike stress patterns in a poem. Avant-garde photographs and paintings, fantastical novels like *Flatland* and Lewis Carroll's children's books, and experimental poetry by Swinburne, Rossetti, and Patmore created worlds governed by a rigorous internal logic, even as they were pointedly unconcerned with reference or realist protocols. Algebraic Art shows that works we tend to regard as outliers to mainstream Victorian culture were expressions of a mathematical formalism that was central to Victorian knowledge production and that continues to shape our understanding of the significance of form.
