Swine Research United States. Cooperative State Research Service. Current Research Information System, 1983 Pork Production Systems Wilson G. Pond, Jerome H. Maner, Dewey L. Harris, 2012-12-06 Pork continues to occupy an important position as a food source in affluent societies as well as in developing countries with slower economic growth The growth of the world swine population continues at a faster rate than that of the human population a reflection of the sustained demand for pork in all parts of the world The technical basis for commercial production of swine was presented in our two earlier textbooks Swine Production in Temperate and Tropical Environments by Pond and Maner 1974 and Swine Production and Nutrition by Pond and Maner 1984 In view of

rapidly advancing technology and an appreciation for the systems approach in industry and agriculture this third book has been restructured to provide the student and practitioner with an integrated concept of pork production We have attempted to blend the fundamental principles from genetics physiology nutrition and biotechnology into the modern concepts of systems analysis and simulation modeling The objective is to create a teaching approach which emphasizes the integrated synthesis of biological with physical and environmental sciences and economics This approach is expected to provide an overall pork production systems view that individual producers can adapt to their specific resources needs and goals Our new co author Dr Dewey Harris has used his expertise and perspective on interacting systems to change the complexion of the book to fulfill this objective In addition Dr
