Switching Goals:

Switching Goals Alex Morgan, 2019-06-11 From FIFA World Cup Champion Olympic gold medalist and bestselling author Alex Morgan comes the tenth book in an empowering and fun filled middle grade series that inspired the streaming original series *The Kicks*. Frida is convinced Devin is her good luck charm. So when Frida lands an audition for a commercial, she begs Devin to come with her. But while she waits backstage, Devin has a bit of good luck of her own: an agent spots her and thinks she'd be perfect to model for an athletic wear photo shoot. Devin doesn't know anything about modeling, but she decides to give it a go. Soon though, her modeling and soccer schedules start to conflict and Devin feels like she's letting her team down in all the chaos. She knows she has to choose between soccer and modeling, but with everyone talking about her playing in college and the rest of the *Kicks* obsessing over a fortune telling app, it feels like Devin has to choose her whole future right now too. Is soccer the goal Devin really wants to keep going for? Or will she shift her eye to another prize?

Work Motivation Gary P. Latham, 2007 Dr. Latham's book is very detailed about under whom and where the major writers on work motivation studied. This makes for interesting asides. His footnotes are both informative and eyebrow-raising. His personal journey through all this is insightful, charming, and a great contribution to understanding the lineage of psychologists. I plan on loaning to other nonpsychologists as well as assigning it to my students.

CANADIAN PSYCHOLOGY: Work Motivation History Theory Research and Practice provides unique behavioral science frameworks for motivating employees in organizational settings. Drawing upon his experiences as a staff psychologist and consultant to organizations, author Gary Latham has written this book in a mentor voice that is highly personal and rich in examples, including enduring influences of mentors on researchers in the field.

Key Features: Includes anecdotes about and from the major thought leaders in the field of motivation. Personal insights from and about leading personalities in the field of

and expectancy value theories of motivation and decision making have one thing in common they all assume that thought or any other type of cognition can move any thing that there is a direct path from cognition to behavior In recent years we have become more and more aware of the complexities involved in the relationship between cognition and behavior People do not always do what they intend to do Aside from several nonpsychological factors capable of reducing cognition behavior consistency there seems to be a set of complex psychological mechanisms which intervene between action related cognitions such as beliefs expectancies values and intentions and the enactment of the behavior suggested by those cognitions In our recent research we have focused on volitional mechanismus which presumably enhance cognition behavior consistency by supporting the main tenance of activated intentions and prevent them from being pushed aside by competing action tendencies
