Swordfish At War:

Stringbag David Wragg,2004-11-01 This is a narrative account of the operations of the Fairey Swordfish throughout World War Two The most famous of these was the attack on the Italian fleet at Taranto crippling three battleships and damaging several other ships as well as the seaplane base and an oil storage depot The Swordfish played a prominent part in the Battle of Matapan and in the sinking of the Bismarck Less happily Swordfish were used in the unsuccessful and ill prepared raid on the Germans at Petsamo and in the abortive attack on the battle cruisers Scharnhorst and Gneisenau during the Channel Dash in 1942

Swordfish at War William Alfred Harrison,1987-01-01 Beskriver det engelske marinefly Swordfish der ved begyndelsen af 2 verdenskrig allerede var ved at være for ldet Alligevel opnåede flytypen vigtige resultater for Fleet Air Arm og Royal Navy som torpedo og rekognosceringsfly

Swordfish Units of World War 2 Matthew Willis,2025-07-17 A fully illustrated account of the World War 2 combat career of the Fairey Swordfish torpedo bomber one of the Royal Navy s most resilient and effective aircraft of the period During the 1930s the Royal Navy s Fleet Air Arm sought an aircraft to combine the functions of torpedo attack reconnaissance and gunnery spotting eventually realising this goal with the Swordfish biplane Despite competition from more modern types like the Blackburn Shark and Barracuda the Swordfish made a key contribution to some of Britain s greatest naval successes of World War 2 helping to tip the balance during operations such as the raid on the Italian battle fleet at Taranto in November 1940 and the attacks on the German battleship Bismarck in May 1941 Elsewhere it assumed an anti submarine role both in the Battle of the Atlantic and when escorting Arctic convoys and was used by the RAF for anti shipping work during the D Day landings and the final stages of the European war With this fascinating study historian Matthew Willis draws on Admiralty files operational records and interviews with Fleet Air Arm aircrew to assemble a wide ranging history of one of the Royal Navy s most important aircraft Archival photographs and 22 newly commissioned colour profiles help to chart the development of the Swordfish detailing the aircraft s resilience and adaptability through both its many victories and its equally eventful defeats

Vichy Air Force at War Jonathan Sutherland,Diane Canwell,2020-01-31 At the beginning of World War II the French faced the German invasion with 4 360 modern combat aircraft and 790 new machines currently arriving from French and American factories each month When the phony war finally ended some 119 of 210 squadrons were ready for action on the north eastern front The others were reequipping or stationed in the French colonies Of the 119 squadrons France could bring into action only one fourth of the aircraft were battle ready With France overrun by June 1940 what remained of the French air force was either concentrated in the unoccupied zone or had been hastily redeployed to the

colonies Nonetheless in retaliation for the British attack on the French fleet in Oran French bombers based in French Morocco carried out retaliatory air raids over Gibraltar The Arme de l Air de Vichy was born and would fight to the best of its ability against the Free Frenchs allies in theatres as distant as north west Africa Syria Lebanon Madagascar and the Far East Not only would they take to the skies against the British and later the Americans they would also willingly take part in aerial duels against Free French pilots Only a handful of books have been written on French aircraft but never has there been a complete history of the operations of the Vichy Air Force and its fratricidal war This title literally spans the globe examining forgotten air combats It is also important to note that many of the Vichy pilots that survived the air combats later volunteered to join the Free French and would fight with great courage and distinction alongside the very pilots that they had been trying to kill rnrnThis book describes all major theatres of combat examines the aircraft flown and lengthy appendices cover operational units victory credits and the Aronautique Navale U. Carrier Operations in World War II J. D. Brown,2009-05-21 Between 1939 and 1945 the Royal Navy s Fleet Air Arm grew from a small force into a powerful strategic weapon British carrier based aircraft fought throughout the world and David Brown here describes their activities in the Home Mediterranean Eastern and British Pacific Fleets together with Forces created for specific operations listing aircraft and units embarked during the various phases He goes on to describe carrier operations in the Pacific between 1941 and 1945 the greatest maritime war in history Both the United States and Imperial Japanese Navies watched the Royal Navy s early carrier operations in the European Theatre and benefited from the lessons American aircrews and sailors learnt quickly in action until by March 1945 the United States Fifth Fleet with its associated Marine Corps formations was probably the most efficient and effective instrument of war deployed in the pre nuclear age This new work contains material from two volumes first published in 1968 and 1974 merged with notes for a third which David Brown prepared but never published before his death They appear for the first time together providing the most detailed single volume account currently available of the operation of British American and Japanese aircraft carriers in World War II **The War at Sea, 1939-1945: The defensive.- v.2. The period of balance.- v.3. The offensive** Stephen Wentworth Roskill,1954 **The Air War at Sea in the Second World War** Martin W. Bowman,2023-06-30 Martin Bowman s considerable experience as a military historian has spanned over forty years during which time he has spent hundreds of hours interviewing and corresponding with numerous men and women and their relatives in Britain America and beyond resulting in a wealth of material on the war at sea from World War One to the Falklands and the wars on terror All these narratives have been woven into a highly readable and emotional outpouring of life and death in action in all his titles as here in World War Two where the men of the Fleet Air Arm and the US Navy fighter operating bomber and torpedo carrying aircraft describe the compelling gripping and thought provoking narrative of the air war in the freezing Atlantic

wastes to the waters of the mighty Pacific The Fleet Air Arm in the Second World War, Volume II, 1942-1943 Ben Jones, 2018-06-13 This is the second of three volumes covering the transformation of the Fleet Air Arm during the Second World War. As the subtitle of this volume *The Fleet Air Arm in Transition* suggests, the years 1942-1943 marked a stepping stone between the small pre-war cadre operating from a small number of carriers to a naval air arm flying modern aircraft types from a large number of ships and as will be seen in Volume III, capable of operating a number of Fleet Carriers in the Pacific Ocean for sustained periods. Whereas the majority of Volume I dealt with operations, this volume has a much more even balance covering planning and policy on the one hand and operations on the other. This reflects the crucial nature of this period as the development and expansion of the Fleet Air Arm gathered pace whilst an increasingly diverse range of operations took place with those in the Mediterranean and the Atlantic reaching a climax. The reader will gain a clear appreciation of the growing importance and primacy of the aircraft carrier within the proposals for the future composition of the Royal Navy's surface fleet together with the nature of the Fleet Air Arm's expansion programmes. Such expansion programmes were hindered by the constraints of aircraft production and the acquisition of sufficient shore facilities for the formation of new squadrons and the continued support of others. Some of the Fleet Air Arm's most famous operations occurred during these years, such as the escort of the Pedestal convoy to Malta, air cover for the landings in North Africa, Sicily and at Salerno, and the gallant but ill-fated attack of 825 Squadron during the Channel Dash. The increasing role played by the Fleet Air Arm aircraft operating from Escort Carriers and Merchant Aircraft Carriers in the Battle of the Atlantic during 1943 is also apparent. The documents in this volume will bring to life the difficulties of operating aircraft at sea, the nature of air combat and the complexities involved in expanding an organisation such as the Fleet Air Arm under wartime conditions. As such, it will enhance our understanding of the history of the Royal Navy's air arm during the Second World War.

Fleet Air Arm Carrier War Kev Darling, 2009-10-15 This is the story of British naval flying from aircraft carriers from its conception in World War One to the present day. It includes the types of aircraft and the men who flew them, the carriers and the evolution of their designs, the theatres of war in which they served and their notable achievements and tragedies. It traces navy flying from the early days of the biplane through the rapid developments during World War Two to the post-war introduction of jet-powered flight. The British inventions of the angled flight deck and later vertical landing jets revolutionised sea warfare and allowed the carrier to play a vital part in many recent land wars when naval aircraft flew in support of Allied land forces. Although the British carriers have always been smaller than their American counterparts, the Royal Navy and its aircraft have always been in the van of the development of ships and aircraft. This is the proud history of British Naval flying and ships such as HMS Eagle, HMS Hermes, HMS Glorious, HMS Ark Royal and many more. *The Fleet Air Arm in the Second World War* Ben Jones, 2016-03-16 This is the first of three volumes detailing the history of the Fleet Air Arm, the Royal Navy's aircraft carriers and naval air squadrons during the Second World War. It deals with the formative period between

1939 and 1941 when the Fleet Air Arm tried to recover from the impact of dual control and economic stringencies during the inter war period while conducting a wide range of operations There is in depth coverage of significant operations including the Norwegian campaign Mediterranean actions such as the attack on the Italian Fleet at Taranto and the Battle of Cape Matapan and the torpedo attacks on the German battleship Bismarck Incidents involving the loss of and damage to aircraft carriers including the sinking of Ark Royal one of the most famous ships in the early years of World War Two are also reported Of major importance are key planning and policy issues These include the requirements for aircraft carriers the evolving debate regarding the necessary types of aircraft and attempts to provide sufficient facilities ashore for naval air squadrons A wide range of official documents are used to enable the reader to appreciate the complexity of the operations and other issues which faced the Fleet Air Arm This volume will appeal to everyone interested in how the Royal Navy adapted to the use of air power in the Second World War Its reports bring actions vividly to life Its correspondence demonstrates the fundamental foundation of planning policy and logistics In common with succeeding volumes on the Fleet Air Arm this volume provides a new and vital perspective on how Britain fought the Second World War British Aircraft of World War II John Frayn Turner, 2016-04-30 This unique book now republished was the first of its kind to be published on British aircraft of the Second World War Aviation enthusiasts and aero modellers can see British aircraft as they really were through magnificently reproduced colour photographs Each of the forty nine types of aircraft is accompanied by a brief biography together with tables of the most important marks and their specifications engine span length height weight crew number maximum speed service ceiling normal range and armament There is also a section on British aircraft in action which includes accounts of outstanding exploits by the pilots of different types John Frayn Turner the well known aviation author has chosen the pictures and provided the text **Combat Biplanes of World War II** Peter C. Smith, 2015-09-30 Aviation and maritime historian Peter C Smith reveals how both Allied and Axis powers used World War I era aircraft in Combat Biplanes of World War II The era of the combat biplane is usually thought to have been between 1914 and 1938 By the outbreak of World War II most of the advanced air forces of the world had moved on to monoplane aircraft for their front line battle forces both in bomber and fighter capacities Yet despite this many biplanes did still survive both in front line service and in numerous subsidiary roles and not just as training machines but as fully operational warplanes Thus in 1939 the majority of major European powers still retained some albeit few biplane aircraft Great Britain had the bulk of such obsolescent machines including the Gladiator Swordfish Walrus Vildebeeste and Audax while the inferior Albacore meant to replace the Swordfish had yet to enter service Germany still managed to conduct missions in which biplanes like the He 50 He 51 and Hs 120 excelled Both France and Italy had active biplanes Mussolini s Regia Aeronautica attaching great importance to the type as a fighter aircraft as late as 1941 while the Soviet Union also retained some machines like the Po 2 in front line service right through the war and beyond By the time Japan and the United States entered the war two years

later they had mainly rid themselves of biplanes but even here a few specialized types lingered on Combat Biplanes of World War II describes many of these gallant old warriors representing the author's own personal selection from a surprisingly large range of aircraft that despite all predictions fought hard and well *Air War Over Greece and Albania 1949-1941* ,

The Fleet Air Arm and the War in Europe, 1939-1945 David Hobbs, 2022-03-30 A comprehensive history of the Royal Navy's naval aviation component's campaigns during World War II For the first time this book tells the story of how naval air operations evolved into a vital element of the Royal Navy's ability to fight a three dimensional war against both the Kriegsmarine and Luftwaffe An integral part of RN the Fleet Air Arm was not a large organization with only 406 pilots and 232 front line aircraft available for operations in September 1939 Nevertheless its impact far outweighed its numbers it was an RN fighter that shot down the first enemy aircraft of the war and an RN pilot was the first British fighter ace with 5 or more kills The Fleet Air Arm's rollcall of achievements in northern waters went on to include the Norwegian Campaign the crippling of Bismarck the gallant sortie against Scharnhorst and Gneisenau as they passed through the Channel air attacks on enemy E boats in the narrow seas air cover for the Russian convoys air attacks that disabled Tirpitz and strikes and minelaying operations against German shipping in the Norwegian littoral that continued until May 1945 By the end of the war in Europe the FAA had grown to 3243 pilots and 1336 aircraft This book sets all these varied actions within their proper naval context and both technical and tactical aspects are explained with thumbnail descriptions of aircraft their weapons and avionics Cross reference with the Fleet Air Arm Roll of Honour has been made for the first time to put names to those aircrew killed in action wherever possible as a mark of respect for their determination against enemy forces on above and below the sea surface which more often than not outnumbered them The Fleet Air Arm and the War in Europe completes David Hobbs's much praised six volume series chronicling the operational history of British naval aviation from the earliest days to the present Praise for The Fleet Air Arm and the War in Europe In this masterly addition to his series on the Fleet Air Arm at war David Hobbs addresses naval air operations in the Atlantic the North Sea the Arctic and the English Channel Professor Andrew Lambert Warship 2023 With lots of action it rattles along and is a very good read The Armourer Magazine May 2022 Flak in World War II Donald Nijboer, 2018-09-01 More than half of the U S's aircraft losses in Europe in World War II were due to German anti-aircraft artillery and many of the American aircraft shot down by Luftwaffe fighters had first been driven out of formation by flak and made easy prey for the fighters A world away in the Pacific American flak guns aboard naval ships formed the last line of defense against Japanese kamikazes Historian Donald Nijboer relies on firsthand accounts newly discovered files photos diagrams and maps to reveal the forgotten contribution of flak in World War II from doctrine and tactics to combat stories on the ground and in the air about what it was like to fly into the teeth of anti-aircraft fire **Canadian Warbirds of the Second World War** Harold A. Skaarup, 2001 This aviation handbook is intended to provide the reader with a quick reference to identify the military aircraft flown by the Royal Canadian Air Force the Royal

Canadian Navy and the Canadian Army during the Second World War The handbooks in this series include a general description and a photograph from the Canadian Forces Archives of at least one of the key variants or marks of each aircraft that has been in Canadian service or used by Canadian servicemen overseas Each aircraft is listed alphabetically by manufacturer number and type General details describing the aircraft s engines service ceiling speed armament or weapons load are included along with a brief description of the Canadian or allied squadron in which Canadian aircrews used the aircraft operationally This is the third volume in the series It describes fighters bombers and patrol aircraft flown by Canadians during the war A list of museums private aircraft collections and other locations where survivors preserved and displayed is also included The handbook is not a definitive list of all Canadian manufactured or operated aircraft but it should serve as a quick reminder of the major examples flown on duty for anyone with an interest in Canadian military aviation

The War for the Seas Evan Mawdsley, 2019-09-24 This impeccable myth busting study of WWII maritime operations sheds new light on the conflict with sharp analysis and an international perspective The Sunday Times UK Command of the oceans was crucial to winning World War II By the start of 1942 Nazi Germany had conquered mainland Europe and Imperial Japan had overrun Southeast Asia and much of the Pacific How could Britain and distant America prevail in what had become a war of continents In this definitive account Evan Mawdsley traces events at sea from the first U boat operations in 1939 to the surrender of Japan He argues that the Allied counterattack involved not just decisive sea battles but a long struggle to control shipping arteries and move armies across the sea Covering all the major actions in the Atlantic and Pacific oceans as well as those in the narrow seas this book interweaves for the first time the endeavors of the maritime forces of the British Empire the United States Germany and Japan as well as those of France Italy and Russia
