In the center, a large, translucent sphere contains a dense cluster of small, glowing cubes, resembling a brain or a data core. Numerous larger, translucent cubes float around this central sphere. The overall color palette is dominated by deep purples, blues, and magentas, with some yellow and white highlights from the glowing elements.

The Mortality and Morality of Nations Uriel Abulof, 2015-07-24 This book answers how mortality and morality figure and intertwine in the life and death of nations both in theory and in practice

[A Buddha Land in This World](#) Lajos Brons, 2022 In the early twentieth century Uchiyama Gud Seno o Gir Lin Qiuwu and others advocated a Buddhism that was radical in two respects Firstly they adopted a more or less naturalist stance with respect to Buddhist doctrine and related matters rejecting karma or other supernatural beliefs And secondly they held political and economic views that were radically anti hegemonic anti capitalist and revolutionary Taking the idea of such a radical Buddhism seriously A Buddha Land in This World Philosophy Utopia and Radical Buddhism asks whether it is possible to develop a philosophy that is simultaneously naturalist anti capitalist Buddhist and consistent Rather than a study of radical Buddhism then this book is an attempt to radicalize it The foundations of this radicalized radical Buddhism are provided by a realist interpretation of Yog c ra elucidated and elaborated with some help from thinkers in the broader Tiantai Tendai tradition and American philosophers Donald Davidson and W V O Quine A key implication of this foundation is that only this world and only this life are real from which it follows that if Buddhism aims to

alleviate suffering it has to do so in this world and in this life Twentieth century radical Buddhists as well as some engaged Buddhists came to a similar conclusion often expressed in their aim to realize a Buddha land in this world Building on this foundation but also on Mah y na moral philosophy this book argues for an ethics and social philosophy based on a definition of evil as that what is or should be expected to cause death or suffering On that ground capitalism should be rejected indeed but utopianism must be treated with caution as well which raises questions about what it means from a radicalized radical Buddhist perspective to aim for a Buddha land in this world Lajos Brons is a Dutch philosopher and social scientist living in Japan After receiving a PhD from the University of Groningen in the Netherlands for a dissertation on an aspect of the history and philosophy of the social sciences he gradually moved further and further into philosophical territory Currently Lajos is teaching logic ethics and philosophy at a university in Tokyo His research interests are divided over two broad areas in philosophy one is in the overlap of meta ethics and social political philosophy the other is in the intersection of philosophy of language metaphysics and epistemology Research in the former focuses on the relations between death suffering and compassion Research in the latter concerns the relations between language thought and reality and is heavily influenced by the philosophies of Donald Davidson and W V O Quine and by Buddhist philosophy More information about publications and research interests as well as Lajos s blog can be found at www.lajosbrons.net
