Cultural Anthropology Raymond Scupin,2019-12-10 Now with SAGE Publishing Cultural Anthropology A Global Perspective delves

into both classic and current research in the field reflecting a commitment to anthropology's holistic and integrative approach. This text illuminates how the four core subfields of anthropology—biological anthropology, archaeology, linguistics, and cultural anthropology—together yield a comprehensive understanding of humanity. In examining anthropological research, this text often refers to research conducted in other fields, sparking the critical imagination that brings the learning process to life. The Tenth Edition expands on the book's hallmark three-themed approach: diversity of human societies, similarities that make all humans fundamentally alike, and a synthetic/complementary approach by introducing a new fourth theme addressing psychological essentialism. Recognizing the necessity for students to develop an enhanced global awareness more than ever before, author Raymond Scupin uses over 30 years of teaching experience to bring readers closer to the theories, data, and critical thinking skills vital to appreciating the full sweep of the human condition. This title is accompanied by a complete teaching and learning package.
