K. Bradby, 1919 **Symbols for Eternity** M. Rolfe, 1980 *Religion in Late Modernity* Robert Cummings Neville, 2012-02-01 Religion in Late Modernity runs against the grain of common suppositions of contemporary theology and philosophy of religion Against the common supposition that basic religious terms have no real reference but are mere functions of human need the book presents a pragmatic theory of

religious symbolism in terms of which the cognitive engagement of the Ultimate is of a piece with the cognitive engagement of nature and persons Throughout this discussion Neville develops a late modern conception of God that is defensible in a global theological public Against the common supposition that religion is on the retreat in late modernity except in fundamentalist forms the author argues that religion in our time is a stimulus to religiously oriented scholarship a civilizing force among world societies a foundation for obligation in politics a source for healthy social experimentation and the most important mover of soul Against the common supposition that religious thinking or theology is confessional and inevitably biased in favor of the thinker's community Neville argues for the public character of theology the need for history and phenomenology of religion in philosophy of religion and the possibility of objectivity through the contextualization of philosophy contrary to the fashionable claims of neo pragmatism This vigorous analysis and program for religious thinking is straightforwardly pro late modern and anti postmodern a rousing gallop along the high road around modernism **Studies**

**Junzaburo** Hosea Hirata, 2014-07-14 This book offers an in depth investigation into the writings of one of modern Japan's most gifted poet scholars Nishiwaki Junzaburo 1894 1982 who has been compared to T S Eliot R M Rilke and Paul Valéry Exploring both his poetry and theoretical writings Hosea Hirata describes how Nishiwaki who wrote his first poems in English and French shaped a highly influential poetic modernism in Japan while elevating the artistic status of translation This volume includes Nishiwaki's highly original essays on the nature of poetry his first two collections of Japanese poems and a poem meditating on the annihilation of symbolism The author maintains that in Japan the language of modernism was that of translation When Nishiwaki finally began to write poems in Japanese a new poetic language was born in his country a translatory language Hirata elaborates this birth of new poetry via translation by referring to the theories of translation and of difference articulated by Walter Benjamin and Jacques Derrida The author reconsiders the view that translated texts are secondary to the originals where the truth supposedly resides instead he presents translation as an essential textual movement critique toward the paradise of pure language and Poetry Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Serpent Imagery and Symbolism** Lura N. The first volume in a trilogy this book and companion volumes treating existence and religion advance a systematic philosophical theology to address first order questions found in the array of Axial Age religions Questions generally arising in the major religious traditions are interrogated with a dialectic of philosophical approaches This volume begins the project with a consideration of ultimacy defined philosophically and illustrated in a wide range of traditions To the question of how or why there is something rather than nothing Neville answers with an elaborate hypothesis about the ontological act of creation that creates all determinate things as related to but different from one another The result is the claim that there are five ultimates the ontological act the form of determinate things the components of determinate things the existential location of determinate things relative to one another and the value identity of ultimate things giving rise to five universal religious problematics of ultimacy respectively the question of existence the ground of obligation the quest for wholeness engaging others and finding meaning Neville analyzes what can and cannot be known about each of these ultimates Readers will find Neville s theory of religion and philosophy a bold one running counter to dominant trends while richly informed by a long and fruitful engagement with theology philosophy and religion East and West **Intelligence, Creativity and**
