Sympathy Between Humans Jodi Compton, 2006-03-13 Seeing Suffering in Women's Literature of the Romantic Era Elizabeth A. Dolan, 2008 As she explores tropes of illness healing and social justice in the writings of Mary Wollstonecraft Charlotte Smith and Mary Shelley Dolan engages with a wide range of primary sources in science and medicine She argues that the Romantic era interest in the physiology of vision influenced the culture's understanding of suffering and that these three authors experimented with materialist modes of seeing in order to expand the language of suffering and to claim literary authority

Aquinas, Science, and Human Uniqueness Mary L. Vanden Berg, 2022-12-15 What is a human being What makes humans special different from other creatures Or is a human just another animal Drawing on Scripture Aquinas and science this book seeks to articulate both why and how humans should be understood as special Despite amazing similarities to other creatures humans are physiologically psychologically and spiritually unique beings No other creatures not even angels have the unique combination of capacities nor the divine calling that humans have Vanden Berg argues that only humans are material spiritual intellectual worshipping beings created specifically for a personal relationship with their Creator and with the stated vocation of caring for God's world and representing God in it

Outward, Visible Propriety Lois Peters Agnew, 2008 In her examination of the eighteenth century transition from classical to modern perspectives in British rhetorical theory Lois Peters Agnew argues that this shift was significantly shaped by resurgent influences of Stoic ethical philosophy Eager to preserve the stability jeopardized by changing political social and economic conditions theorists of the period found in the Stoic principle of *sensus communis* the possibility of constructing a collective identity across a fragmented society To that end Agnew states

prominent rhetoricians turned to the works of the Roman Stoics and to their ethical system as adapted in the writings of Cicero and Quintilian in particular. In tracing Stoic strains in eighteenth century language theories, Agnew argues that writers such as Adam Smith, Henry Home, Lord Kames, Hugh Blair, George Campbell, and Richard Whately drew upon Stoic ideas and the earlier work of Lord Shaftesbury, Francis Hutcheson, and Thomas Reid in their integration of Stoic ethics and rhetorical theory. Deeply concerned with the effects of granting individuals moral autonomy, these intellectuals found in Stoicism a vocabulary for responding to this issue as Stoic notions of individual sensory experiences, personal moral development, and public virtue confirmed and expanded the interconnectivity between private deliberation and communal cohesion. Thus, Agnew argues, their familiarity with ancient thought enabled British rhetoricians to craft from Stoic ideas distinctly eighteenth century perspectives on how rhetoric could not only accomplish specific practical goals but also prepare individuals to fulfill their ethical potential to the community. **BOOK JACKET**

Evolution, Human Behaviour and Morality Olli Lagerspetz, Jan Antfolk, Ylva Gustafsson, Camilla Kronqvist, 2016-08-12. This book highlights the recent reemergence of Edward Westermarck's work in modern approaches to morality and altruism, examining his importance as one of the founding fathers of anthropology and as a moral relativist who identified our moral feelings with biologically evolved retributive emotions. Questioning the extent to which current debates on the relationship between biology and morality are similar to those in which Westermarck himself was involved, the authors ask what can be learnt from his arguments and from the criticism that he encountered. Drawing on Westermarck's manuscripts and papers as well as his published work, the authors show the importance of situating debates, whether modern or classical, in their correct methodological and philosophical context. This volume is a rigorous assessment of the ways in which morality is connected with human biological nature. It plays close attention to the development of debates in this field and will appeal to scholars of sociology, anthropology, and philosophy.

Materiality in Modernist Short Fiction Laura Oulanne, 2021-05-30. Materiality in Modernist Short Fiction provides a fresh approach to reading material things in modern fiction, accounting for the interplay of the material and the cultural. This volume investigates how Djuna Barnes, Katherine Mansfield, and Jean Rhys use the short story form to evoke the material world as both living and lived, and how the spaces they create for challenging gendered social norms can also be nonanthropocentric spaces for encounters between the human and the nonhuman. Using the unique knowledge created by literary works to spark new conversations between phenomenology, cognitive studies, and new materialisms, complemented with a feminist perspective, this book explores how literature can touch the basic experience of being in feeling and making sense of a material world that is itself alive and active. From a sensitive reading of how three women used the material world to make their readers see, feel, and question the norms shaping our experience, this volume draws a theory of reading affective materiality that illuminates modernism and the short story form but also reaches beyond them. friendly writing style bestselling author Amy Newman deftly captures various approaches in which corporations and people respond to situations in difficult times and learn from mistakes Using real companies and situations each chapter examines a leadership character dimension such as accountability integrity authenticity and courage Readers will learn to develop their own character emotional intelligence and leadership skills as they engage with assessments reflection opportunities and exercises

Energy, Ecocriticism, and Nineteenth-Century Fiction Barri J. Gold, 2021-04-10 *Energy Ecocriticism and Nineteenth Century Fiction* Novel Ecologies draws on energy concepts to revisit some of our favorite books *Mansfield Park Jane Eyre Great Expectations and The War of the Worlds* and the ways these shape our sense of ourselves as ecological beings Barri J Gold regards the laws of thermodynamics not solely as a set of physical principles but also as a cultural and conceptual form that we can use to reimagine our historically vexed relationship to the natural world Beginning with an examination of the parallel inceptions of energy and ecology in the mid nineteenth century this book considers the question of how we may better read and interpret our world developing a recipe for experimental reading and insisting upon the importance of literary studies in a world driving to ecological catastrophe

Beiser, 2023 *Philosophy of Life* explores the intellectual movement *Lebensphilosophie* which flourished in Germany from 1870 until 1920 led by Nietzsche Dilthey and Simmel This was the first Western intellectual movement to develop an entirely secular and humanist conception of life believing that the meaning of life had to be found in life itself

Human Nature, Mind and the Self in Adam Smith's Moral Philosophy Riccardo Bonfiglioli, 2024-04-24 This book investigates the problematisation in Adam Smith's moral philosophy of a classical question what makes us human beings from a moral standpoint To do this Riccardo Bonfiglioli explores the relationship between the concepts of human nature mind and the self in order to reconstruct Smith's theory of subjectivity After providing a systematic reconstruction of Adam Smith's conceptions of human nature mind and the self exploring some aspects of Smith's philosophy nature philosophy of history sympathy and imagination and their empirical expressions education conduct and character Bonfiglioli argues that in Adam Smith's work the meaning of moral human beings would depend on the human being's effort to live in harmony with oneself and the others According to Bonfiglioli in Smith's moral theory this harmony with oneself and the others would be achieved in relation to a certain kind of awareness that can be possible when human beings try to judge the conduct and try to act according to the impartial spectator Specifically this impartial spectator is reinterpreted by the author in the light of the concept of immediacy

Rogers, 2025-01-28 A powerful new account of what a group of nineteenth and twentieth century African American activists intellectuals and artists can teach us about democracy Could the African American political tradition save American democracy African Americans have had every reason to reject America's democratic experiment Yet African American activists intellectuals and artists who have sought to transform the United States into a racially just society have put forward some of the most original and powerful ideas about how to make America live up to its democratic ideals In The Darkened Light of Faith Melvin Rogers provides a bold new account of African American political thought through the works and lives of individuals who built this vital tradition a tradition that is urgently needed today The book reexamines how figures as diverse as David Walker Frederick Douglass Anna Julia Cooper Ida B Wells W E B Du Bois Billie Holiday and James Baldwin thought about the politics people character and culture of a society that so often dominated them Sharing a light of faith darkened but not extinguished by the tragic legacy of slavery they resisted the conclusion that America would always be committed to white supremacy They believed that democracy is always in the process of becoming and that they could use it to reimagine society But they also saw that achieving racial justice wouldn't absolve us of the darkest features of our shared past and that democracy must be measured by how skillfully we confront a history that will forever remain with us An ambitious account of the profound ways African Americans have reimagined democracy The Darkened Light of Faith offers invaluable lessons about how to grapple with racial injustice and make democracy work
