A Subject Index to Current Literature Australian Public Affairs Information Service, *Exploring Social Rights*

Daphne Barak-Erez, Aeyal Gross, 2007-12-19. *Exploring Social Rights* looks into the theoretical and practical implications of social rights. The book is organized in five parts. Part I considers theoretical aspects of social rights and looks into their place within political and legal theory and within the human rights tradition. Part II looks at the status of social rights in international law with reference to the challenge of globalisation and to the significance of specific regional regulation such as the European System. Part III includes discussions of various legal systems which are of special interest in this area: Canada, South Africa, India, and Israel. Part IV looks at the content of a few central social rights such as the right to education and the right to health, and Part V discusses the relevance of social rights to distinct social groups: women and people with disabilities. The articles in the book, while using the category of social rights, also challenge the separation of rights into distinct categories and question the division of rights to civil vs. social rights from a perspective which considers all rights as social. This book will be of interest to anyone concerned with human rights, the legal protection of social rights, and social policy. Social rights are the stepchildren of the human rights family: Are they really rights? Can courts enforce them? And does it make any difference when they try? This remarkable collection of essays by distinguished scholars offers important new responses to all the basic questions. Ranging across disciplinary and national boundaries and brimming with both theoretical and practical insights, the book is especially welcome in this moment of mounting inequalities and growing interest in the
