followers who view these odd events as channeled messages from a transcendent realm of spiritual reality Instead Williams concludes that meaningful coincidences are the surface manifestations of an individual s unique creative process accommodating the best available resolution of a problem for a person initially feeling stuck in a seemingly intractable dilemma While his analysis robs the magic associated with only reacting to the numinous uncanny aura associated with synchronicities it nevertheless affirms a wondrous appreciation for the creative capacities of each person to order his or her own chaos Readers are treated to a rich mine of historical data novel concepts and theoretical insights drawn from speculative philosophy depth psychology and esoteric occult and spiritual traditions and they are shown how to decode their own synchronicities in order to be able to use their embedded messages for increased self awareness cohesiveness and expanding consciousness

**Synchronicity** M. D. Faber, 1998-10-30 Synchronistic events can be explained fully in naturalistic terms They comprise an instance of the uncanny as they return the individual subjectively to a period when the world as the good parent was sympathetically attuned to the individual's wishes and requirements Jung invoked the spiritual or the supernatural or the paranormal to explain synchronicity rather than exploring the early stages of human existence Faber offers a critique of Jung's theory of synchronicity that develops an alternative to demystify synchronistic happenings by explaining them in purely naturalistic terms The book's larger purpose is to demystify Jung's archetypal psychology and to explain the whole Jungian approach to human behavior in naturalistic terms Because Jung's psychology is ultimately religious in nature the book touches generally upon the implications of religion and religious conduct The book offers the reader an opportunity to ponder the psychological nature of synchronicity either as a spiritual occurrence with paranormal overtones or as a return of the repressed a mnemonic trace of events that actually transpired in the life of the individual
