Syncretistic Religious Communities In The Near East:

origins and evolution from a revolutionary movement to an inward looking religious order *Iraa* Heather Bleaney, Roper, Peter Sluglett, 2004-06-01 Well considered answers to the many questions raised by the situation in Iraq past and present are rare This first comprehensive thematically organised bibliography devoted to Iraq is based on the full Index Islamicus database and is drawn from a wide variety of European language journals and books Featuring an extensive introduction to the subject and its literature by Peter Sluglett this bibliography will help readers to find their way through the massive secondary literature now available Following the pattern established by the Index Islamicus both journal articles and book publications are included as well as important internet resources The editors have taken care to add much new material to bring its coverage up to date and supplement the previously published volumes while the most important and or influential publications are conveniently highlighted in the introduction An indispensable gateway for all those with a more than superficial interest in what is and what has been happening in this nation so much the focus of attention today in Turkey David Shankland, 2003-12-08 This is the only volume dedicated to the Alevis available in English and based on sustained fieldwork in Turkey The Alevis now have an increasingly high profile for those interested in the diverse cultures of contemporary Turkey and in the role of Islam in the modern world As a heterodox Islamic group the Alevis have no established doctrine This book reveals that as the Alevi move from rural to urban sites they grow increasingly secular and their religious life becomes more a guiding moral culture than a religious message to be followed literally But the study shows that there is nothing inherently secular proof within Islam and that belief depends upon a range of contexts

Middling Romanticism Zachary Sng,2020-06-02 Romanticism is often understood as an age of extremes yet it also marks the birth of the modern medium in all senses of the word Engaging with key texts of the romantic period the book outlines a wide reaching project to re imagine the middle as a constitutive principle Sng argues that Romanticism dislodges such terms as medium moderation and mediation from serving as mere self evident tools that conduct from one pole to another Instead they offer a dwelling in and with the middle an attention to intervals interstices and gaps that make these terms central to modern understandings of relation
