

Jamaican Creole: A brief syntactic sketch

1. Introduction

Data acquisition was completed through conversation with a native Jamaican Creole speaker, supplemented by existing material which covers the syntax of Jamaican Creole. The researcher posed a series of questions to the native JC speaker, also taking into account instances of non-prompted speech. The elicited responses, in addition to examples from prior studies form the basis of the following sketch.

The Crucible of Carolina Michael Montgomery, 1994 The ten essays in The Crucible of Carolina explore the connections between the language and culture of South Carolina s barrier islands West Africa the Caribbean and England Decades before any formal scholarly interest in South Carolina barrier life outsiders had been commenting on and documenting the African qualities of the region s black inhabitants These qualities have long been manifest in their language religious practices music and material culture Although direct contact between South Carolina and Africa continued until the Civil War the era of Caribbean contact was briefer and ended with the close of the American colonial period Throughout this volume though the contributors look beyond the cultural motivations and political appeal of strengthening the links between coastal Carolina and Africa and examine the cost of a diminished recognition of this important Caribbean influence Not surprisingly the influence of the pioneering linguist Lorenzo Dow Turner is reflected in many of these essays The work presented in this volume however moves beyond Turner in dealing with the discourse and stylistic aspects of Gullah in relating patters of Gullah to other Anglophone creoles and to various processes of creolization and in questioning the usefulness of retention survival and continuity as operational concepts in comparative research Within this context of furthering and challenging Turner s work in the barrier islands and in seeking a truer measure of both African and Caribbean influences there the contributors cover such topics as names and naming the language of religious rituals basket making traditions creole discourse patterns and the grammatical morphology of Gullah and related creole and pidgin

languages Other contributors consider the substrate contributions and African continuities to be found in New World language patterns into new patterns adapted to the various situations in the New World Opening new and advancing previous areas of research The Crucible of Carolina also contributes to a further appreciation of the richness and diversity of South Carolina s cultural heritage *Syntactic Heads and Word Formation* Marit Julien,2002-09-26 Marit Julien investigates the relation between morphology and syntax or more specifically the relation between the form of inflected verbs and the position of those verbs She surveys 530 languages and shows that with the exception of agreement markers the positioning of verbal inflectional markers relative to verb stems is compatible with a syntactic approach to morphology Down by the Riverside Charles Joyner,2022-08-15 Charles Joyner takes readers on a journey back in time up the Waccamaw River through the Lowcountry of South Carolina past abandoned rice fields once made productive by the labor of enslaved Africans past rice mills and forest clearings into the antebellum world of All Saints Parish In this community and many others like it enslaved people created a new language a new religion indeed a new culture from African traditions and American circumstances Joyner recovers an entire lost society and way of life from the letters diaries and memoirs of the plantation whites and their guests from quantitative analysis of census and probate records and above all from the folklore and oral history of the enslaved Americans His classic reconstruction of daily life in All Saints Parish is an inspiring testimony to the ingenuity and solidarity of a people This anniversary edition of Joyner s landmark study includes a new introduction in which the author recounts his process of writing the book reflects on its critical and popular reception and surveys the past three decades of scholarship on the history of enslaved people in the United States **Focus on the USA** Edgar W. Schneider,1996-01-01 This volume presents 15 original research papers by renowned specialists in their respective fields A variety of research traditions are included such as dialect geography and sociolinguistics but also smaller sub fields such as the study of slang and perceptual dialectology Varieties studied include the South the Eastern Seaboard the Middle West African American English Cuban English and others A growing sense of unity in the discipline is reflected by recurring topics and methods across earlier boundaries between sub disciplines For instance computerized data and statistical analyses are standard tools nowadays and a few papers explicitly address the possibilities and limitations of these methods The study of variation and change of linguistic varieties has largely replaced earlier monolithic notions of dialect and the question of change in dialects the erosion of traditional speech forms under the impact of modern communication patterns and socio economic developments is investigated in several contributions In general a recent orientation towards the history and development of nonstandard varieties is reflected in the book several papers study diffusion patterns of linguistic forms or discuss the emergence of individual dialects or dialectal forms in a language contact framework Altogether the papers provide a lively illustration of and a fairly representative selection from ongoing high quality linguistic research into American English Annotated Bibliography of Southern American English James B.
