The Linguistic Structure of Modern English Laurel J. Brinton, Donna Brinton, 2010. This text is for advanced undergraduate and graduate students interested in contemporary English, especially those whose primary area of interest is English as a second language, primary or secondary school education, English stylistics, theoretical and applied linguistics, or speech pathology. The emphasis is on empirical facts of English rather than any particular theory of linguistics; the text does not assume any background in language or linguistics. In this newly revised edition, numerous example sentences are taken from the Corpus of Contemporary American English. A full glossary of key terms, an additional chapter on pedagogy, and new sections on cognitive semantics and politeness have been added. Other changes include completely updated print references, web links to sites of special interest and relevance, and a revised reader-friendly layout. A companion website that includes a complete workbook with self-testing exercises and a comprehensive list of web links accompanies the book. The website can be found at the following address: <http://dx.doi.org/10.1075/z.156.workbook>. Students completing the text and workbook will acquire a knowledge of the sound system of contemporary English, an understanding of the formation of English words, a comprehension of the structure of both simple and complex sentences in English, a recognition of complexities in the expression of meaning, an understanding of the context and function of use upon the structure of the language, and an

appreciation of the importance of linguistic knowledge to the teaching of English to first and second language learners

Laurel J Brinton is Professor of English Language at the University of British Columbia Donna M Brinton is Senior Lecturer in TESOL at the University of Southern California s Rossier School of Education The Linguistic Structure of Modern English is a revised edition of The Structure of Modern English by Laurel J Brinton 2000 *Sentence Patterns in English and Hebrew* Ron Kuzar,2012-10-30 Sentence Patterns in English and Hebrew offers an innovative perspective on sentential syntax in which sentence patterns are introduced as constructions within the general framework of Construction Grammar Drawing on naturally occurring data collected from the Internet the study challenges the prevailing view of predication as the sole mechanism of sentence formation and introduces the idea of patterning as a complementary sometimes even alternative mechanism Major sentence patterns of English and Hebrew are systematically presented targeting both their form and their function A contrastive analysis of the sentence patterns in these two languages results in postulating a typological group in which cognitive motivations are shown to account for both similarities and differences within the typology Sentence Patterns in English and Hebrew will appeal to scholars of constructional approaches cognitive linguistics typology syntax as well as anyone interested in English and Hebrew **Linguistics and Language Behavior Abstracts** ,2007 *Elements of Comparative Syntax* Enoch Aboh,Eric Haeberli,Genoveva Puskás,Manuela Schönenberger,2017-09-11 This volume brings together a selection of articles illustrating the multifaceted nature of current research in generative syntax The authors including some of the leading figures in the field present analyses of typologically diverse languages with some studies drawing on dialectal acquisitional and diachronic evidence Set against this rich empirical background the contributions address an equally wide range of theoretical issues **The Oxford Handbook of English Grammar** Bas Aarts,Jill Bowie,Gergana Popova,2020 This handbook provides an authoritative critical survey of current research and knowledge in the grammar of the English language The volume s expert contributors explore a range of core topics in English grammar covering a range of theoretical approaches and including the relationship between core grammar and other areas of language *A Semantic Approach to English Grammar* R. M. W. Dixon,2005-07-01 This book shows how grammar helps people communicate and looks at the ways grammar and meaning interrelate The author starts from the notion that a speaker codes a meaning into grammatical forms which the listener is then able to recover each word he shows has its own meaning and each bit of grammar its own function their combinations creating and limiting the possibilities for different words He uncovers a rationale for the varying grammatical properties of different words and in the process explains many facts about English such as why we can say I wish to go I wish that he would go and I want to go but not I want that he would go The first part of the book reviews the main points of English syntax and discusses English verbs in terms of their semantic types including those of Motion Giving Speaking Liking and Trying In the second part Professor Dixon looks at eight grammatical topics including complement clauses transitivity and causatives passives and the promotion of a non subject to

subject as in Dictionaries sell well This is the updated and revised edition of A New Approach to English Grammar on Semantic Principles It includes new chapters on tense and aspect nominalizations and possession and adverbs and negation and contains a new discussion of comparative forms of adjectives It also explains recent changes in English grammar including how they have replaced the tabooed he as a pronoun referring to either gender as in When a student reads this book they will learn a lot about English grammar in a most enjoyable manner

The Syntactic Phenomena of English James D. Case, Referentiality, and Phrase Structure

Balk?z Öztürk, 2005-01-01 This book proposes that the two independent conditions on argumenthood namely case and referentiality are strongly correlated and have to be associated with each other in syntax as syntactic features It shows that languages exhibit variation in the way this association is implemented in their syntax which presents an explanation for the differences observed in their phrase structure in terms of non configurationality Thus this book not only presents an innovative overarching theory for case and referentiality but also aims to bring a new look at the issues of non configurationality It specifically argues for parameterization of functional categories associated with case and referentiality which has certain implications not only for the acquisition but also for the diachronic development of functional categories Providing rich comparative data from typologically different languages such as Turkish Chinese Hungarian English and Japanese this book is of particular interest to typologists as well
