Volume 1* Claudia Maienborn,Klaus von Heusinger,Paul Portner,2011-07-27 No detailed description available for SEMANTICS MAIENBORN ET AL BD 33 1 HSK E BOOK   Sentence First, Arguments Afterward Lila R. Gleitman,2020 Sentence First Arguments Afterward collects the important papers of Lila Gleitman a pioneer of the field of cognitive science The book explores language from the perspective of language acquisition linguistic relativity and the very nature of syntax and semantics Gleitman reveals insights that are important both for their perspective on the history of the field and for current practice in the study of language and thought   **Processing East Asian Languages** Hsuan-Chih Chen,Xiaolin Zhou,1999 This volume presents an exciting sample of the most recent research on the processing of Chinese Japanese and Korean   *Lexikon Der Sprachwissenschaft* Hadumod Bussmann,1996 In over 2 500 entries this Dictionary provides an exhaustive survey of the key terminology and languages of more than thirty sub disciplines of linguistics   Reanalysis in Sentence Processing J. Fodor,Fernanda Ferreira,2013-03-14 The topic addressed in this volume lies within the study of sentence processing which is one of the major divisions of psycholinguistics The goal has been to understand the structure and functioning of the mental mechanisms involved in sentence comprehension Most of the experimental and theoretical work during the last twenty or thirty years has focused on first pass parsing the process of assigning structure to a sentence as its words are encountered one at a time from left to right One important guiding idea has been to delineate the processing mechanisms by studying where they fai For this purpose we identify types of sentences which perceivers have trouble assigning structure to An important class of perceptually difficult senten ces are those which contain temporary ambiguities Since the parsing mechanism cannot tell what the intended structure is it may make an incorrect guess Then later on in the sentence the structure assignment process breaks down because the later words do not fit with the incorrect structural analysis This is called a garden path situation When it occurs the parsing mechanism must

somehow correct itself and find a different analysis which is compatible with the incoming words This reanalysis process is the subject of the research reported here **Case and Linking in Language Comprehension** Markus Bader,Josef Bayer,2006-05-09 The German language due to its verb final nature relatively free order of constituents and morphological Case system poses challenges for models of human syntactic processing which have mainly been developed on the basis of head initial languages with little or no morphological Case The verb final order means that the parser has to make predictions about the input before receiving the verb What are these predictions What happens when the predictions turn out to be wrong Furthermore the German morphological Case system contains ambiguities How are these ambiguities resolved under the normal time pressure in comprehension Based on theoretical as well as experimental work the present monograph develops a detailed account of the processing steps that underly language comprehension At its core is a model of linking noun phrases to arguments of the verb in the developing phrase structure and checking the result with respect to features such as person number and Case This volume contains detailed introductions to human syntactic processing as well as to German syntax which will be helpful especially for readers less familiar with psycholinguistics and with Germanic *The Semantics of Polysemy* Nick Riemer,2008-08-22 This book addressed primarily to students and researchers in semantics cognitive linguistics English and Australian languages is a comparative study of the polysemy patterns displayed by percussion impact hitting verbs in English and Warlpiri Pama Nyungan Central Australia The opening chapters develop a novel theoretical orientation for the study of polysemy via a close examination of two theoretical traditions under the broader cognitivist umbrella Langackerian and Lakovian Cognitive Semantics and Wierzbickian Natural Semantic Metalanguage Arguments are offered which problematize attempts in these traditions to ground the analysis of meaning either in cognitive or neurological reality or in the existence of universal synonymy relations within the lexicon Instead an interpretative rather than a scientific construal of linguistic theorizing is sketched in the context of a close examination of certain key issues in the contemporary study of polysemy such as sense individuation the role of reference in linguistic categorization and the demarcation between metaphor and metonymy The later chapters present a detailed typology of the polysemous senses of English and Warlpiri percussion impact or P I verbs based on a diachronically deep corpus of dictionary citations from Middle to contemporary English and on a large corpus of Warlpiri citations Limited to the operations of metaphor and of three categories of metonymy this typology posits just four types of basic relation between extended and core meanings As a result the phenomenon of polysemy and semantic extension emerges as amenable to strikingly concise description **Verbal Projections** Hero Janßen,2011-04-20 This collection of articles examines lexical and grammatical aspects of verbal elements and phrases in the context of recent generative research General questions concern definitions of grammatical categories classifications of auxiliaries and particles as functional categories and problems of economy Lexical matters range from affixation and category change participles gerunds to semantic representations of specific verb classes possessive phrasal

and intransitive verbs The syntactic analyses focus on positional arrangements of aspectual and verbal units V2 Verb Raising The data are mainly drawn from English perspectives on other Germanic languages are included *Knowledge and Language* E. Reuland,W. Abraham,2012-12-06 1 BACKGROUND This volume is one of three which emerged from the Conference on Knowledge and Language held from May 21 May 25 1989 at the occasion of the 37 5th anniversary of the University of Groningen Studying the relation between knowledge and language one may distinguish two different lines of inquiry one focussing on language as a body of knowledge the other on language as a vehicle of knowledge Approaching language as a body of knowledge one faces questions concerning its structure and the relation with other types of knowledge One will ask then how language is acquired and to what extent the acquisition of language and the structure of the language faculty model relevant aspects of other cognitive capacities If language is approached as a vehicle for knowledge the question comes up what enables linguistic entities to represent facts about the world To what extent does this reply on conventional aspects of mean ings Is it possible for language when used non conventionally as in metaphors to convey intersubjective knowledge If so and it does seem to be the case one may wonder what makes this possible The aim of this conference was to investigate the role of conceptual structure in cognitive processes exploring it from the perspectives of philosophy of language linguistics political philosophy psychology liter ary theory aesthetics and philosophy of science The themes of these three volumes reflect the themes of the conference **The Interface of Language, Vision, and Action** John Henderson,Fernanda Ferreira,2013-05-24 This book brings together chapters from investigators on the leading edge on this new research area to explore on the leading edge on this new research area to explore common theoretical issues empirical findings technical problems and outstanding questions This book will serve as a blueprint for work on the interface of vision language and action over the next five to ten years <u>The Cambridge Handbook of Role and Reference Grammar</u> Delia Bentley,Ricardo Mairal Usón,Wataru Nakamura,Robert D. Van Valin, Jr,2023-06-07 Role and Reference Grammar RRG is a theory of language in which linguistic structures are accounted for in terms of the interplay of discourse semantics and syntax With contributions from a team of leading scholars this Handbook provides a field defining overview of RRG Assuming no prior knowledge it introduces the framework step by step and includes a pedagogical guide for instructors It features in depth discussions of syntax morphology and lexical semantics including treatments of lexical and grammatical categories the syntax of simple clauses and complex sentences and how the linking of syntax with semantics and discourse works in each of these domains It illustrates RRG s contribution to the study of language acquisition language change and processing computational linguistics and neurolinguistics and also contains five grammatical sketches which show how RRG analyses work in practice Comprehensive yet accessible it is essential reading for anyone who is interested in how grammar interfaces with meaning **Complex Predicates in Japanese** Chiharu Uda Kikuta,2018-11-01 Originally published in 1994 this volume analyses complex predicate constructions in Japanese in the framework of Head driven Phrase Structure Grammar

HPSG The book presents the theoretical framework as a basis of the following analyses and discusses thematic roles reflexive binding and case marking Attention is also given to passive benefactive and causative constructions *Psychology of Learning and Motivation* ,1991-12-02 Psychology of Learning and Motivation **Psycholinguistics** Gerry T. M. Altmann,2002 <u>Perspectives on Sentence Processing</u> Charles Clifton, Jr.,Lyn Frazier,Keith Rayner,Charles Clifton,2015-12-22 One of the liveliest forums for sharing psychological linguistic philosophical and computer science perspectives on psycholinguistics has been the annual meeting of the CUNY Sentence Processing Conference Documenting the state of the art in several important approaches to sentence processing this volume consists of selected papers that had been presented at the Sixth CUNY Conference The editors not only present the main themes that ran through the conference but also honor the breadth of the presentations from disciplines including linguistics experimental psychology and computer science The variety of sentence processing topics examined includes how evoked brain potentials reflect sentence comprehension how auditory words are processed how various sources of grammatical and nongrammatical information are coordinated and used how sentence processing and language acquisition might be related This distinctive volume not only presents the most exciting current work in sentence processing but also places this research into the broader context of theorizing about it **Annual Workshop on Formal Approaches to Slavic Linguistics** Jindřich Toman,1996 **The Architecture of the Language Faculty** Ray Jackendoff,1997 Ray Jackendoff steps back to survey the broader theoretical landscape in linguistics in an attempt to identify some of the sources of the widely perceived malaise with respect to much current theorizing Over the past twenty five years Ray Jackendoff has investigated many complex issues in syntax semantics and the relation of language to other cognitive domains He steps back in this new book to survey the broader theoretical landscape in linguistics in an attempt to identify some of the sources of the widely perceived malaise with respect to much current theorizing Starting from the Minimalist necessity for interfaces of the grammar with sound meaning and the lexicon Jackendoff examines many standard assumptions of generative grammar that in retrospect may be seen as the product of historical accident He then develops alternatives more congenial to contemporary understanding of linguistic phenomena The Architecture of the Language Faculty seeks to situate the language capacity in a more general theory of mental representations and to connect the theory of grammar with processing To this end Jackendoff works out an architecture that generates multiple co constraining structures and he embeds this proposal in a version of the modularity hypothesis called Representational Modularity Jackendoff carefully articulates the nature of lexical insertion and the content of lexical entries including idioms and productive affixes The resulting organization of the grammar is compatible with many different technical realizations which he shows can be instantiated in terms of a variety of current theoretical frameworks Linguistic Inquiry Monograph No 28 **Autolexical Theory** Eric Schiller,Elisa Steinberg,Barbara Need,2011-06-24 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of

the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing **Heterogeneity in Word-formation Patterns** Susanne Muehleisen,2010 Postulated word formation rules often exclude formations that can nevertheless be found in actual usage This book presents an in depth investigation of a highly heterogeneous word formation pattern in English the formation of nouns by suffixation with ee Rather than relying on a single semantic or syntactic framework for analysis the study combines diachronic cognitive and language contact perspectives in order to explain the diversity in the formation and establishment of ee words It also seeks to challenge previous measurements of productivity and proposes a new way to investigate the relationship between actual and possible words By making use of the largest and most up to date electronic corpus the World Wide Web as a data source this research adds substantially to the number of attested ee words It furthermore analyses this word formation pattern in different varieties of English British vs American English Australian English Due to the multiplicity of approaches and analyses it offers the study is suitable for courses in English word formation lexicology corpus linguistics and historical linguistics
