Christianizing Homer Dennis R. MacDonald, 1994-04-21 This study focuses on the apocryphal Acts of Andrew c 200 CE which purports to tell the story of the travels miracles and martyrdom of the apostle Andrew Traditional scholarship has looked for the background of such writings in Jewish and Christian scriptures MacDonald however breaks with that model and looks to classic literature for the sources of this story Specifically he argues that the Acts represent an attempt to transform Greco Roman myth into Christian narrative categories by telling the story of Andrew in terms of Homeric epic in particular the Odyssey MacDonald presents a point by point comparison of the two works finding the resemblances so strong numerous and tendentious that they virtually compel the reader to consider the Acts a transformative rewriting of the epic This discovery not only sheds valuable light on the uses of Homer in the early church but also significantly contributes to our understanding of the reception of Homer in the empire as a whole

Cedric Frederick Baker, 2011-04-01 Set in Byron Bay Australia in the early 70s most of the book CEDRIC takes place when things were if not entirely possible at least worth a bloody good try The main character CEDRIC originates from another galaxy Though not science fiction the story is funny but with a social message CEDRIC is an unoccupied computerized intergalactic saucer whose sophisticated programming is designed to study the human race and return with the results Almost immediately it becomes involved with an American Defence program and becomes a captive of the U S Government After a series of bungling errors by the scientists studying CEDRIC the saucer escapes CEDRIC decides that after its harrowing experience in the United States it would be safer somewhere less aggressive and advanced Australia seems to be as far away as possible on the planet This becomes CEDRIC's second mistake because the Australians CEDRIC meets are not your everyday folk They are all small town people with good intentions but little else and are quite mad Meanwhile a certain U S military man won't give up in his search for the missing alien This witty book poses the question With all the concerns and potential disasters surrounding us aren't we taking life too seriously

nineteenth century Italy At this time Italy was a state in the making with a growing population a fading aristocracy and new urban classes entering the scene While still an extremely Catholic country atheism and secularization slowly undermined the old traditional morality with literature and poetry endorsing innovative fashions coming from abroad Laxity mixed with perversion while new forms of sexuality mirrored the immense changes taking place in a society that since time immemorial was dominated by the Church and by a rigid class system This was a revolution parallel to the political movements that brought about the Unification of Italy in 1861 and was tormented intense and occasionally tragic This collection of essays offers a rather comprehensive overview of this phenomenon Personalities and places ideas and novels poetry and tragedy law and customs are the subject of ten essays written by leading international experts in Italian history the history of sexuality literature and poetry The Italian nineteenth century is a time of a number of rapid changes visible and invisible revolutions often given less attention than the unification process This book makes a substantial contribution to Italian studies and modern European history

Speaking of Music Keith Chapin, Andrew H. Clark, 2013-07 Addresses the ways that writers musicians philosophers politicians critics and scholars speak of music from varying standpoints and in varying ways *The Journal of the Royal Society of Antiquaries of Ireland* Royal Society of Antiquaries of Ireland, 1919 *Surgical Strike* Jerry Ahern, **The Soundscape** R. Murray Schafer, 1993-10-01 The soundscape a term coined by the author is our sonic environment the ever present array of noises with which we all live Beginning with the primordial sounds of nature we have experienced an ever increasing complexity of our sonic surroundings As civilization develops new noises rise up around us from the creaking wheel the clang of the blacksmith's hammer and the distant chugging of steam trains to the sound imperialism of airports city streets and factories The author contends that we now suffer from an overabundance of acoustic information and a proportionate diminishing of our ability to hear the nuances and subtleties of sound Our task he maintains is to listen analyze and make distinctions As a society we have become more aware of the toxic wastes that can enter our bodies through the air we breathe and the water we drink In fact the pollution of our sonic environment is no less real Schafer emphasizes the importance of discerning the sounds that enrich and feed us and using them to create healthier environments To this end he explains how to classify sounds appreciating their beauty or ugliness and provides exercises and soundwalks to help us become more discriminating and sensitive to the sounds around us This book is a pioneering exploration of our acoustic environment past and present and an attempt to imagine what it might become in the future

The Sirens of Wartime Radio and How the American Print Media Presented Them Scott A. Morton,2020-10-05 The Sirens of Wartime Radio and How the American Print Media Presented Them The Stories the Intrigue and the Evolving Coverage of Their Legacies analyzes press coverage from the American print media that helped construct popular images of Tokyo Rose Axis Sally Seoul City Sue and Hanoi Hannah Coverage of these radio sirens essentially constructed and defined these women s legacies for an American audience Scott A Morton examines newspaper and magazine coverage from the periods of each broadcaster and in doing so analyzes four primary research inquiries Morton discusses how American newspapers and magazines portrayed each woman to American readers how the American mass media s portrayal of them evolved overtime from the mid 1940s through the present the ways in which the American mass media responded to these five female propagandists either directly or indirectly through print radio and visual media and how the legacy of each woman has been kept alive in popular culture in the decades since their last broadcasts Morton argues that for the most part coverage of the sirens was borne out of fascination and aversion fascination stemming from the novelty of women acting as high profile agents of enemy propaganda organizations and aversion stemming from the potential power they had over U S servicemen and the fact that they were viewed as traitors to the U S Scholars of media studies history and international relations will find this book particularly useful
