Exploring the Role of Visualization in Climate Change Communication - an Audience Perspective Anne Gammelgaard Ballantyne, 2018-05-08 Climate change communication is a topical and relevant issue and it is widely acknowledged that public communication about causes impacts and action alternatives is integral to addressing the challenges of the changing climate Climate visualization concerns the communication of climate information and data through the use of different information technologies and different modes of visual representation In the context of climate change communication climate visualization is highlighted as a potential way

of increasing public engagement with climate change. In particular, developments within information technology have provided significant advancements that are claimed to be transformative in engaging lay audiences with issues relating to the mitigation of and adaptation to climate change. Nevertheless, there is a lack of research exploring climate visualization from an audience perspective. This thesis addresses this gap. The overarching aim is thus to explore the role of climate visualization in climate change communication from an audience perspective, focusing specifically on how lay audiences make meaning of climate change as represented in two examples of climate visualization. In addition, the thesis discusses the potential contributions and/or limitations of climate visualization from a communication perspective. Based on a social semiotic theoretical framework, this thesis employs focus group interviews to study participants' meaning-making related to two cases of climate visualization: a dome theatre movie developed for Swedish high school students with the aim of encouraging reflection on climate change causes, impacts, and mitigation alternatives; and a web-based tool for climate change adaptation developed to assist Nordic homeowners in adapting to the local impacts of climate change. The results of this thesis show that climate visualization can help audiences concretize otherwise abstract aspects of climate change and that the localized focus can make climate change appear more personally relevant and interesting for targeted audiences. Nevertheless, despite these communicative qualities, the analyses also show that participants' interpretations are shaped by their preconceptions of climate change as a global and distant issue to be solved by other actors, such as national governments or through international policy negotiations. Although climate visualization can enhance a sense of proximity with climate change, the localization of climate risk can also lead to participants downplaying the significance of climate impacts. In addition, despite the intentions of inducing a sense of agency in both cases of climate visualization, participants critically negotiated messages concerning their roles as individuals in mitigating or adapting to climate change and assigned this responsibility onto other actors. These findings show that although climate visualization presents certain communicative qualities, it is not a panacea for engaging lay audiences with climate change. This also underlines the importance of considering cultural and social aspects of the communicative event when studying and developing climate visualization tools as a means of communication.

Kommunikation kring klimat förändringar är ett aktuellt och relevant mnen och många bedömare anser att kommunikation kring orsaker, effekter och möjliga alternativ är en viktig del i arbetet med att minska klimatutmaningarna. Klimatvisualisering är en process för att skilja klimatinformation och klimatdata med hjälp av olika tekniker och metoder för visuell framställning. I forskningslitteraturen om klimatkommunikation lyfts visualisering fram som ett möjligt sätt att öka allmänhetens engagemang i klimatfrågan. I synnerhet har utvecklingen inom informationsteknik lett till betydande framsteg som kan ses som omvälvande när det gäller att engagera lekman i frågor som rör utsläppssminskningar och klimatanpassning. Det är dock brist på forskning om klimatvisualisering ur ett mottagarperspektiv. Denna avhandling adresserar denna kunskapslucka. Det övergripande syftet är således att utforska visualiseringens roller i klimatkommunikation ur ett mottagarperspektiv med särskilt fokus på hur lekman

tolkar innebörden av klimatförändringar så som de representeras i tv exempel på klimatvisualisering Avhandlingen behandlar även klimatvisualiseringens möjliga bidrag och eller begränsningar ur ett kommunikationsperspektiv Med utgångspunkt i ett teoretiskt ramverk som inspirerats av socialsemiotiska teorier genomfördes fokusgruppsstudier för att studera deltagarnas meningsskapande i relation till tv exempel på klimatvisualisering en film som visas i en domteater framtagen för svenska gymnasieelever med möjligheten att uppmuntra till reflektion kring klimatförändringarnas orsaker effekter och alternativ för utsläppsminskning samt ett webbaserat verktyg för klimatanpassning som utvecklats för att stödja hushåll i Norden att anpassa sig till klimatförändringarnas lokala effekter Resultaten av denna avhandling visar att klimatvisualisering kan stödja mottagarna att konkretisera annars abstrakta aspekter av klimatförändringar och att ett lokalt fokus kan för klimatförändringarna att framstå som mer personligt relevanta och intressanta för målgruppen Dock visar analyserna även trots dessa kommunikativa kvaliteter att deltagarnas tolkningar formas av deras förhållningssätt om klimatförändringar som ett globalt och avlägset problem som ska lösas av andra aktörer så som nationella regeringar eller genom internationella politiska förhandlingar även om klimatvisualisering kan förstärka känslan av närhet till klimatförändringar kan lokaliseringen av klimatriskerna även leda till att deltagare tonar ned de lokala klimatriskernas betydelse Dessutom trots att både fallen av klimatvisualisering avsevärt att skapa en känsla av att kunna påverka blev ansvaret för klimatförändringar förblir för kritisk förhandling för deltagarnas sida de förblir ansvaret för att hantera klimatutmaningarna till andra aktörer Dessa resultat visar att klimatvisualisering visserligen har vissa kommunikativa kvaliteter men inte någon patentlösning för klimatkommunikation Detta understryker även vikten av att ta hänsyn till kulturella och sociala aspekter av den kommunikativa handlingen när man studerar och utvecklar verktyg för klimatvisualisering

Less Frequently Used Research Methodologies in Applied Linguistics A. Mehdi

Riazi, 2024-01-15 Research methodology plays a pivotal role in generating new knowledge in any academic discipline Applied Linguistics AL researchers use a variety of research methodologies to address different research problems and research questions given its interdisciplinary nature Notwithstanding the plethora of research methodologies used by AL researchers there are some methodologies that are used less frequently The aim of this volume is to introduce and discuss these less frequently used methodologies Each methodology is discussed in two chapters a theoretical and a practical chapter In the theoretical chapters the theoretical foundations methodological orientation ethical issues and critiques and responses are discussed In the practical chapters a showcase study is presented and discussed including why the methodology was used how it was implemented the challenges the researchers faced and the insights they gained The volume contributes to the current methodological discussion in AL and provides early career and seasoned researchers with the necessary discussion about these methodological orientations Future AL researchers may use these methodologies to investigate research questions in their areas of interest In addition the volume can complement current methodological resources in postgraduate research methodology courses

After Broadcast News Bruce A. Williams, Michael X. Delli

Carpini, 2011-09-26 The new media environment has challenged the role of professional journalists as the primary source of politically relevant information After Broadcast News puts this challenge into historical context arguing that it is the latest of several critical moments driven by economic political cultural and technological changes in which the relationship among citizens political elites and the media has been contested Out of these past moments distinct media regimes eventually emerged each with its own seemingly natural rules and norms and each the result of political struggle with clear winners and losers The media regime in place for the latter half of the twentieth century has been dismantled but a new regime has yet to emerge Assuring this regime is a democratic one requires serious consideration of what was most beneficial and most problematic about past regimes and what is potentially most beneficial and most problematic about today's new information environment
