Unfolding Crisis in Assam's Tea Plantations Deepak K. Mishra, Vandana Upadhyay, Atul Sarma, 2014-03-21 As the Indian economy integrates into global circuits of production exchange and accumulation the burdens of adjustment are shared unequally by different sectors classes and regions This study unravels the livelihood strategies and living conditions of labour in the tea gardens of Assam The tea sector has been undergoing a crisis since the 1990s with stagnant production decline in exports and closures of many tea gardens leading to large scale retrenchments in the labour force Based on a detailed analysis of secondary data and primary field research the study examines the extent types and implications of inter generational occupational mobility or immobility among tea garden labourers in Assam In the process it reflects on how even a sector that had brought capital and labour from outside and contributed significantly to the country's export earnings failed to create dynamic growth linkages within the local economy The experience of the labour force in the Assam tea sector the authors argue is important for making sense not only of the development dynamics of the region but of the contradictory ways in which forces of globalisation and neo liberal reforms have been reshaping the worlds of labourers in the margins The book will be of interest to students and scholars of labour studies development studies management studies and studies of north east India as well as to policy makers and those in the tea industry

Apparel Merchandising R. Rathinamoorthy, R. Surjit, 2017-10-31 Apparel Merchandising has been written keeping in mind the requirements of students academicians and industry personnel with respect to the merchandising activities in an apparel company This book discusses the different job responsibilities of the merchandiser at the varied stages of order execution from buyer contact to dispatch Further the chapters also detail the different sampling procedures followed in industry to get product approval This book will be a useful tool for all the budding technocrats academicians and industry personnel to carry out the merchandising activities in an apparel company

Decent Work: Concept, Theory and Measurement Nausheen Nizami, Narayan Prasad, 2017-04-03 This book introduces readers to the concept and theories of decent work and provides a framework for measuring it at the micro meso and macro level in a given country Further it addresses the importance of measuring decent work in today's world and in connection with the different challenges countries face depending on their respective stage of development The essence of the book lies in highlighting the practical applications of decent work in terms of its ability to deliver empirical measurements of qualitative and subjective phenomena with a mixed methods approach combining tools and techniques from economics and statistics Moreover as the applicability of decent work is not confined to the IT industry and formal sectors of the economy the book also provides useful guidelines on how further empirical studies can be undertaken to measure decent work in non IT industries As such the book offers a rich compilation of empirical and theoretical contributions on decent work designed to not only enrich readers understanding but also promote awareness of the practical relevance and technical aspects of the subject matter

Mergers and Acquisitions P. L. Beena, 2014-10-10 This book provides a holistic account of

India & World Geography YCT Expert Team, 2021 22 UPSC IAS All PCS India World Geography

Water Management and Inclusive Growth of Agriculture Prof. Bharat Daga Patil, 2021-02-02 INTRODUCTION Employing nearly on half of the world s workforce agriculture is clearly of great economic and social importance An incredible variety of methods is used globally the Western world has the latest scientific and industrial advancements at its disposal yet in some parts of the Third World a living is made using tools that have hardly changed in two thousand years Thus the study of agriculture geography is clearly important The subject may be simply defined Agricultural geography seeks to describe and explain spatial variations in agricultural activity over the earth s surface The heart of this task is to explain the great diversity of agriculture It has been estimated that there are over 250 million farmers in the world Between them they grow many different crops at least 1000 species are in use and they raise these crops in a variety of ways Thus on some British farms aircraft spray the land with pesticides and computers control the day to day running of the farm yet in parts of the Middle East fellahin still raise wheat with implements little changed since biblical times Equally great are the differences in organization and social conditions Many farmers in Britain or the USA are rich and successful owning their land in parts of Latin America peons toil on land they do not own under conditions not far removed from slavery Even more striking are the differences in productivity One American farm worker can produce enough food to feed nearly fifty other people yet throughout Africa and Asia many farmers are hard pressed to feed themselves and their families David Grigg 1995

Structural Changes and Productivity in Small Scale Industries , Minerals and Coal Process Calculations

D.V. Subba Rao,2016-12-08 The aim of process calculations is to evaluate the performance of minerals and coal processing operations in terms of efficiency of the operation grade of the final products and recovery of the required constituents To meet these requirements in depth detailed calculations are illustrated in this book This book is designed to cover all the process calculations The method and or steps in process calculations have been described by taking numerical examples Process calculations illustrated in a simple and self explanatory manner based on two basic material balance equations will allow the reader to understand the contents thoroughly Inclusion of elaborate process calculations in every chapter is the highlight of this book This book is unique and devoted entirely to the process calculations with sufficient explanation of the nature of the calculations This book will prove useful to all from student to teacher operator to engineer researcher to designer and process personnel to plant auditors concerned with minerals and coal processing
