buildings and contexts To this movement SOM's designers did not react with historical quotation or eclectic reference but rather by accepting the contextual obligation as part of their more urgent quest for a strong architecture that is both modern and compatible with its setting SOM addressed important urban problems with seminal studies for San Antonio Chicago and Washington as well as with designs for large urban transportation facilities on the East Coast At the same time the firm sought work abroad in the face of a barren domestic economy designing universities new towns airport terminals and commercial buildings on several continents Whereas regret surrounds plans for Iranian cities halted by political revolt planning projects of this kind introduced the firm's teams to social urgency and primary research into indigenous form The energy crisis brought still other challenges Its special requirements created new architectural opportunities that have been demonstrated by buildings in a variety of locations SOM early recognized the potential of computer analysis and pioneered its adoption in dealing with structural and architectural problems This capability dramatically extended SOM's capacity for the creative study of energy efficiency and performance calculations

SOM Oswald W. Grube,1984 SOM's growth as a large architectural firm began almost fifty years ago By 1981 there were nine offices in the United States with a total of more than 2 000 members The decades 1973 1983 brought retirement to a number of well known founding partners
