

Reflection is a useful skill

Reflecting helps you develop your skills and review their effectiveness, rather than just carry on doing things as you have always done them. It is about questioning, in a positive way, what you do and why you do it and then deciding whether there is a better, or more efficient, way of doing it in the future.

Skill Education Reflection Experie:

Skill and Education: Reflection and Experience Bo Göransson, Magnus Florin, 2012-12-06 This book has an important starting point in the conference held in Stockholm in May/June 1988 on Culture Language and Artificial Intelligence. It assembled more than 300 researchers and practitioners in the fields of technology philosophy history of ideas literature linguistics social science etc. The conference was an initiative from the Swedish Center for Working Life based on the project AI Based Systems and the Future of Language Knowledge and Responsibility in Professions within the COST 13 programme of the European Commission. Participants in the conference and researchers related to its aims were chosen to contribute to this book. It is preceded by Knowledge Skill and Artificial Intelligence ed B Göransson and I Josefson Springer Verlag 1988 Artificial Intelligence Culture and Language ed B Göransson and M Florin Springer Verlag 1990 and Dialogue and Technology Art and Knowledge ed B Göransson and M Florin Springer Verlag 1991. The two latter books have the same conference connection as this one and their aim is to present the contours of a research field with a multitude of issues that demands thorough investigation. The contributors' thinking in this field varies greatly so do their styles of writing. For example contributors have varied in their choice of he or she for the third person. No distinction is intended but chapters have been left with the original usage to avoid extensive changes. Similarly individual contributors' preference as to notes or reference lists have been followed.
