produced out of single mind of the dreaming person Can we intentionally transform the dream scenarios If so what would be the philosophical implications of it Can dreams and sleeps be utilized for spiritual elevation and many more questions we always wondered about the daily eight hours of our bed time but never got the right answers to We find new meanings and ways in dealing with our dreams in this volume therefore it is a must read for every dream enthusiast as well as any serious spiritual seeker

Strogatz,2013-03-13 Over the past three years I have grown accustomed to the

puzzled look which appears on people's faces when they hear that I am a mathematician who studies sleep. They wonder but are usually too polite to ask what does mathematics have to do with sleep. Instead they ask the questions that fascinate us all. Why do we have to sleep? How much sleep do we really need? Why do we dream? These questions usually spark a lively discussion leading to the exchange of anecdotes, last night's dreams and other personal information. But they are questions about the function of sleep and interesting as they are, I shall have little more to say about them here. The questions that have concerned me deal instead with the timing of sleep. For those of us on a regular schedule questions of timing may seem vacuous. We go to bed at night and get up in the morning going through a cycle of sleeping and waking every 24 hours. Yet to a large extent the cycle is imposed by the world around us.
