Speechwriting in Perspective Thomas H. Neale, Jean M. Bowers, 2003 Writing for the spoken word is a special discipline it requires that speechwriters products be written primarily although not exclusively to be heard not read Speeches are better cast in simple direct and often short sentences that can be easily understood by listeners Rhetorical devices such as repetition variation cadence and balance are available to and should be used by the speechwriter It is important for speechwriters to analyse audiences according to factors such as age gender culture profession and income level size of audience political affiliation if any and on the occasion for or purpose of the speech Most effective speeches do not exceed 20 minutes in length After researching a topic speechwriters must prepare an outline from which the speech will be developed They should strive to maintain a clear theme throughout the speech Most speeches will have a three part structure consisting of an introduction a body and a conclusion The accepted style of contemporary American public address is natural direct low key casual and conversational This puts the listeners at ease and promotes a sense of community between the audience and speaker Punctuation should reflect the sound structure of the speech reinforcing the rhythm and pace of actual speech Clarity of expression is as important a consideration in speech grammar as rigid adherence to the rules for written law This book presents the essentials of speechwriting Preface Speechwriting in Perspective A Brief Guide to Effective and Persuasive Communication Thomas H Neale Public Speaking and Speechwriting Selected References Jean M Bowers Index Practical Teaching in Emergency Medicine Amal Mattu, Michael E. Winters, Joseph P. Martinez, 2011-09-07 Inherent to the teaching and practice of emergency medicine are specific challenges not found in other specialties the unknowns of the emergency department the need to identify life and limb threatening conditions the pressure to solve problems and find solutions quickly and the orchestration of clinical specialists and ancillary services Because of these

unique demands books written by clinicians from other disciplines that extrapolate their information from other specialties aren't always suitable references for teachers of emergency medicine. This book is different; it shows how to incorporate effective teaching strategies into the unique teaching atmosphere of the emergency department, how to effectively lecture, lead small groups, give feedback, foster life-long faculty development skills, and much more. It is written by emergency medicine physicians for emergency medicine physicians. *Practical Teaching in Emergency Medicine* gets to the essential core of how to best teach the art of practicing emergency medicine and provides the blueprint to become a better teacher, providing guidance on how to accomplish skilful teaching in busy emergency departments. It provides emergency physicians and trainees with the necessary tools to effectively and efficiently transmit information to learners in the often-times chaotic emergency department environment. *Practical Teaching in Emergency Medicine* Robert L. Rogers, Amal Mattu, Michael E. Winters, Joseph P. Martinez, Terrence Mulligan, 2012-12-03. Emergency medicine attendings who wish to hone their teaching skills can find a number of books on educational strategies written by physicians from other disciplines. However, until the publication of the first edition of this book, they did not have access to a text written by emergency medicine physicians on methods of teaching that are directly applicable to teaching EM. This book was compiled to meet that need. Following the introductory section, which provides important background information, the book's contents are organized into 4 sections that correspond to the core needs and interests of EM educators. Section 2 focuses on practical and ethical considerations of teaching in the ED. Section 3 provides strategies for teaching specific groups of learners. Section 4 looks at the skills that are characteristic of the best EM educators, and Section 5 looks in depth at specific teaching techniques and strategies. Now more than ever, this book addresses the needs of physician educators from all over the world. New chapters discuss lecturing to an international audience, using simulation as a teaching tool, how to make journal club work for you, and other topics that are of broad interest to medical educators in this field. In general, each chapter has been updated and reviewed to make sure the content was something that emergency physician educators could use in any country. The chapter contributors are widely regarded as leaders in the field of emergency medicine education and faculty development. Authors were given free rein to develop their chapters and write in their own style. They were asked to present their personal views on how to successfully teach the art of emergency medicine rather than review evidence-based guidelines regarding medical education. As a result, most of the chapters have few references. This first-person approach to a multi-authored textbook yields a compilation that varies in style from chapter to chapter and exposes the reader to a variety of communication techniques. *Presenting at Conferences, Seminars and Meetings* Kerry Shephard, 2005-01-26. Do you dread the nerve-racking task of giving presentations? Or are you looking for new ways in which to give your presentation a boost?
