Special Forest Products ,2001 **Special Forest Products** ,2001 **Special Forest Products** ,2001 *General Technical Report PNW-GTR* ,2002 Nontimber Forest Products in the United States Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002

A quiet revolution is taking place in America's forests. Once seen primarily as stands of timber, our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized. Now as timber harvesting becomes more mechanized and requires less labor, the image of the lumberjack is being replaced by that of the forager. This book provides the first comprehensive examination of nontimber forest products (NTFPs) in the United States, illustrating their diverse importance, describing the people who harvest them, and outlining the steps that are being taken to ensure access to them. As the first extensive national overview of NTFP policy and management specific to the United States, it brings together research from numerous disciplines and analytical perspectives such as economics, mycology, history, ecology, law, entomology, forestry, geography, and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs. The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products, an overview of uses and users, and discussions of sustainable management issues associated with ecology, cultural traditions, forest policy, and commerce. They examine some of the major social, economic, and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations. Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape, from the Pacific Northwest to the Caribbean. From honey production to a review of nontimber forest economies still active in the United States, such as the Ojibway harvest of plants recounted here, the book takes in the whole breadth of recent NTFP issues, including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands. No other volume offers such a comprehensive overview of NTFPs in North America. By examining all aspects of these products, it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests.

Science Findings ,2000 **Nontimber Forest Product Opportunities in Alaska** ,2006

Nontimber forest products from southern Alaska, also called special forest products, have been used for millennia as resources vital to the livelihoods and culture of Alaska Natives and more recently as subsistence resources for the welfare of all citizens. Many of these products are now being sold, and Alaskans seek additional income opportunities through sustainable harvest and manufacture of such forest resources. We discuss the unique legal, regulatory, land tenure, geographic, vegetation, and climatic context that southern Alaska presents for marketing nontimber forest products, summarize the various species and types of products being harvested, and consider the marketing challenges and opportunities new entrepreneurs will encounter. The information and resources we provide are intended to enhance

income opportunities for all Alaskans while sustaining the organisms harvested respecting traditional activities and ensuring equitable access to resources

Oregon's Forest Resources, 2001-2005, 2008 This report highlights key findings from the most recent 2001 2005 data collected by the Pacific Northwest Forest Inventory and Analysis PNW FIA Program across all ownerships in Oregon We present basic resource information such as forest area land use change ownership volume biomass and carbon sequestration structure and function topics such as biodiversity older forests dead wood and riparian forests disturbance topics such as insects and diseases fire invasive plants and air pollution and information about the forest products industry in Oregon including data on tree growth and mortality removals for timber products and nontimber forest products The appendices describe inventory methods and design in detail and provide summary tables of data with statistical error for the suite of forest characteristics sampled

Nontimber Forest Products Management on National Forests in the United States Rebecca Jean McLain, 2005 This study provides an overview of nontimber forest products NTFP programs on national forests in the United States We conducted an email survey in 2003 to obtain data on NTFP management activities on national forests across the country Program characteristics examined in the study included important NTFPs managed on national forests presence of NTFP coordinators and law enforcement programs on ranger districts incorporation of NTFPs into forest planning documents presence of NTFP inventory and monitoring programs managers views on barriers to and opportunities for including NTFP harvesters in NTFP inventory and monitoring efforts and managers perceptions of barriers to expanding commercial NTFP harvesting The data indicate that the agency is constructing a foundation for scientific NTFP management The study identifies lack of funding and internal administrative capacity as key barriers to adequate incorporation of NTFPs in Forest Service planning inventory and monitoring
